Message from Chairperson of the Board of Directors

Honorable Shareholders

The 2025/26 fiscal year was a period of significant economic, regulatory and competitive change. Against this environment, the Bank continued to expand its business, strengthen its financial position and advance the institutional capabilities required to support its longer-term growth.

Globally, economic activity remained resilient but uneven, amid continued geopolitical uncertainty, trade tensions, elevated debt levels and volatility in commodity and energy markets. These developments added complexity to an already challenging operating environment and reinforced the importance of prudent risk management and institutional resilience. As the year progressed, the outbreak of war in the Middle East introduced a further significant shock, disrupting energy markets and international trade routes, including severe interruptions to shipping routes passing through the Strait of Hormuz. In its July 2026 World Economic Outlook update, the International Monetary Fund (IMF) projected global growth at 3.0% for 2026, updated downwardly by 0.1% from its April 2026 projection. The IMF also noted that the global disinflation process had stalled temporarily due to the conflict and associated energy-price pressures.

Domestically, Ethiopia continued to advance its macroeconomic reform agenda while maintaining a strong economic activity with projections of 10% growth. Inflation also showed a significant improvement during the first part of the fiscal year before renewed external pressures emerged later in the year. Headline inflation declined to a single digit in December 2025 and remained within this range through March 2026. However, it subsequently edged upward, largely reflecting external shocks stemming from the conflict in the Middle East and the resulting disruptions to fuel supplies. These developments generated broader spill over effects on domestic production, monetary and fiscal policy conditions, and the implementation of ongoing macroeconomic reforms.

During the fiscal year, the financial sector continued to undergo substantial reform. Changes to the risk based capital adequacy framework, liberalization of interest-rate and floating of foreign-exchange rate are contributing to a progressively more market-oriented and competitive banking system. These developments created significant opportunities for the sector, while also placing greater demands on banks in relation to capital planning, risk management, operational efficiency, technology, and customer service.

Against this backdrop, Wegagen Bank recorded continued growth momentum during the fiscal year, demonstrating resilience amid a challenging operating environment and reaffirming its commitment to creating sustainable value for shareholders. Total income reached Birr 16.4 billion during the year, reflecting a strong year on year growth of 21% from Birr 13.5 billion registered in the preceding year. Meanwhile, total expenses stood at Birr 12.1 billion, representing a sharp increase of 25% from the previous year. Subsequently, profit before tax amounted to Birr 4.3 billion from the Birr 3.85 billion a year earlier, registering 12% growth. As a result, Return on Average Assets (ROAA) stood at 3.2% and Return on Average Equity (ROAE) at 20.9%.

The Bank also recorded strong balance-sheet growth during the fiscal year. Total deposit reached Birr 81.3 billion as of June 30, 2026, up from Birr 66.2 billion a year earlier, marking a 23% increase. In tandem, deposits mobilized from interest free banking services reached Birr 4.9 billion as of June 30, 2026, marking 3% year-on-year growth.

Gross loans and advances grew by 26% to Birr 67.3 billion, while total assets expanded by 32% and reached Birr 111.3 billion, compared with Birr 84.3 billion at the end of the preceding year. In line with its commitment to advancing financial inclusion, the Bank disbursed Birr 5.99 billion in loans through its flagship Efoyta digital lending platform, expanding access to finance, particularly for women, youth entrepreneurs, and Micro, Small and Medium Enterprises (MSMEs).

The continued expansion of deposits underscores the importance of maintaining a strong and diversified funding base, while the growth in lending reflects the Bank's active role in channelling mobilized resources toward productive economic activities while addressing the evolving financing requirements of its customers.

In respect to foreign-currency generation, the Bank recorded an encouraging progress by mobilizing USD 366 million during the fiscal year, registering an increase of 34% over the last year same period. Strengthening foreign-currency generation will remain an important business priority as the Bank responds to changing market conditions and the evolving foreign-exchange environment.

During the 2025/26 Fiscal Year, the Bank continued to strengthen its capital base, with paid-up capital increasing from Birr 7.0 billion in the preceding financial year to Birr 10.1 billion as of June 30, 2026. Subsequently, total capital reached Birr 17.3 billion. Likewise, the number of shareholders increased to 15,598 as of June 30, 2026, reflecting continued shareholder confidence in the Bank.

During the period under review, the Bank continued to expand its customer base and accelerate the adoption of digital banking services. The number of deposit accounts surpassed five million, registering a 15% increase from the preceding year, while more than four million customers subscribed to the Bank's mobile banking service. The Bank also recorded significant growth in other digital channels, with the number of cardholders increasing by 45% to 537,651 and internet banking subscribers rising by 86% to 41,494. Similarly, mobile wallet subscribers reached 664,347.

The Bank's physical distribution network also expanded to 458 branches, supported by 398 ATMs, 651 point-of-sale (PoS) terminals and 7,445 agents. The Bank's physical and digital network continues to provide an important foundation for improving accessibility and convenience for customers. Going forward, the Bank's focus will increasingly extend beyond channel expansion to driving digital adoption, improving service quality and enhancing operational efficiency.

Human capital remained an important institutional priority. As of June 30, 2026, the Bank's workforce, including contract personnel, stood at 5,555 employees. During the year, the Bank provided 7,138 staff training opportunities through internal, external and international programs, supported by an investment of Birr 94.5 million. Continued investment in skills and leadership capability will be particularly important as technology, regulation and customer expectations reshape the banking industry.

The Bank also continued its corporate social responsibility activities during the year, with initiatives directed toward community needs, financial inclusion and broader social development. The Bank remains committed to contribute meaningfully to an environmentally responsible, socially inclusive and well-governed society through the implementation of its ESG policy.

An important institutional development during the period was the preparation of the Bank's new five-year strategic plan. The strategy was developed with consideration of developments in the evolving banking landscape, technological advancements, changing customer expectations, emerging market opportunities and the intensifying competitive environment. It is intended to strengthen the Bank's market position and institutional capabilities while supporting sustainable long-term value creation for shareholders and other stakeholders.

Looking ahead, the Bank will leverage opportunities stemming from financial-sector reforms, technological advances and the Ethiopian capital market while managing risks arising from geopolitical uncertainty, foreign-exchange volatility, regulatory changes and intensifying competition. Accordingly, the Bank will advance digital transformation, deepen customer relationships, improve operational efficiency, strengthen risk management and expand capital-market activities through its subsidiary, Wegagen Capital Investment Bank.

The Board will continue to provide sound governance and disciplined oversight while supporting Management in executing the Bank's strategic priorities, with particular focus on enhancing asset quality, maintaining a stable and diversified funding base, ensuring sound capital and liquidity management, improving operational efficiency, strengthening risk management and internal control capabilities, and consistently delivering compelling value propositions that respond to evolving customer needs and reinforce the Bank's competitive position over the long term.

Finally, on behalf of the Board of Directors, I wish to extend my sincere appreciation to our shareholders for their continued confidence in the Bank and to our customers for the trust they place in us. I would like to also express my heartfelt gratitude to the Bank's Management and employees for their unwavering dedication, as well as to the regulatory authorities, business partners and other stakeholders whose continued cooperation and support have contributed to the Bank's progress and development.

Mr. Abdishu Hussien
Chairperson, Board of Directors

Message from the Sharia Advisory Committee (SAC)

For the Fiscal Year Ended June 30, 2026

"In the name of Allah, the most Compassionate, the most Merciful"

In accordance with the Interest Free Banking (IFB) provisions under the corporate governance framework of Wegagen Bank S.C. and applicable Sharia standards, including those issued by the Accounting and Auditing Organization for Islamic Financial Institutions (AAOIFI), the Sharia Advisory Committee (SAC) is pleased to present its report to the shareholders of the Bank for the fiscal year ended June 30, 2026.

During the fiscal year, the Bank continued to provide and develop its Interest-Free Banking services under the Wegagen Amanah brand. Within the Bank's branch, IFB services were delivered through full-fledged IFB branches, partitioned IFB sub-branches and designated IFB windows. The Bank's IFB offering comprised fund mobilization, financing and service-based products designed to serve customers seeking Sharia-compliant banking solutions.

During the fiscal year, the SAC carried out its advisory, oversight, review and certification roles in relation to the Bank's Interest-Free Banking operations. In its advisory role, the Committee provided Sharia guidance and Fatwa on products, contracts, financing structures, operational procedures and other matters requiring Sharia interpretation.

In its oversight role, it met regularly, documented its deliberations and followed up on matters requiring Sharia-compliance attention. The SAC also reviewed and certified relevant IFB procedures, contracts, product structures and agreements to ensure conformity with Sharia principles and applicable standards.

Based on the Committee's review of the Bank's IFB operations and relevant activities for the fiscal year ended June 30, 2026, the SAC hereby confirms that the Bank's Interest-Free Banking operations were conducted in accordance with applicable Sharia principles and requirements.

The SAC appreciates the Board of Directors, Management, and employees of Wegagen Bank S.C. for their continued cooperation and commitment to maintaining Sharia compliance and strengthening the Bank's Interest-Free Banking services.

Thank You!

Sheikh Ibrahim Dawud	Ustaz Mohammed Ferej	Sheikh Fethulbari Mohammednur

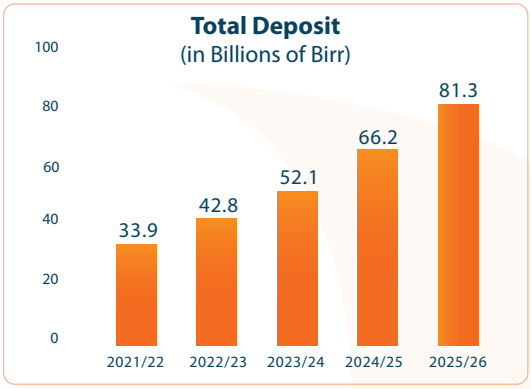
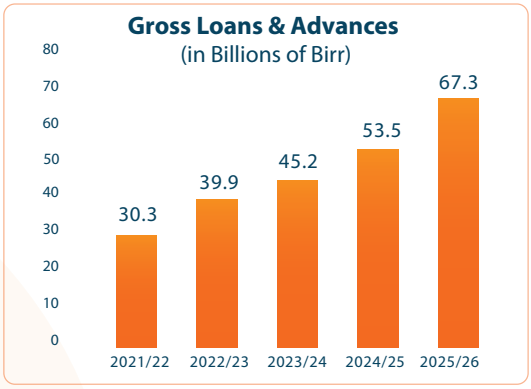
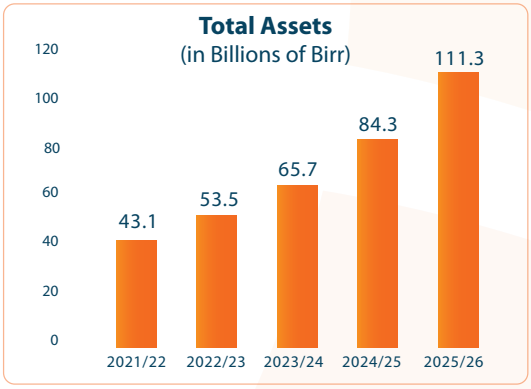
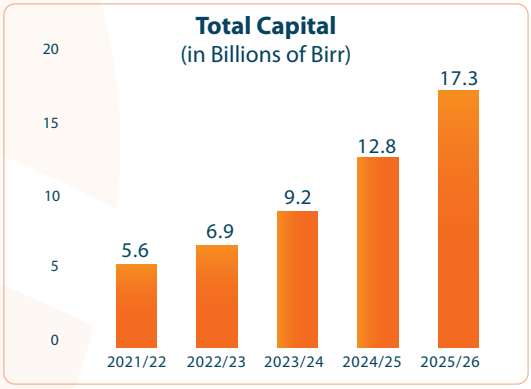
Wegagen Bank S.C
Annual Financial Statement
For the Year Ended 30 June 2026

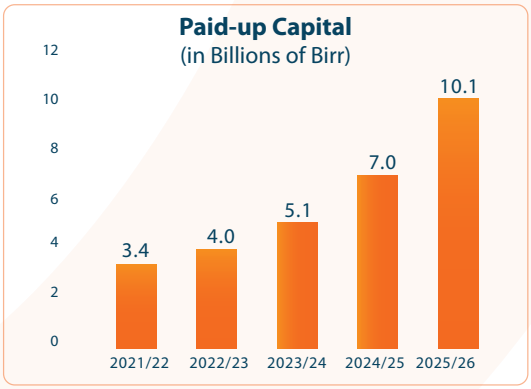
PERFORMANCE HIGHLIGHTS

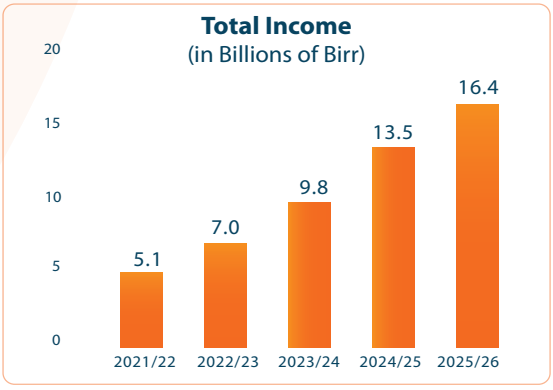


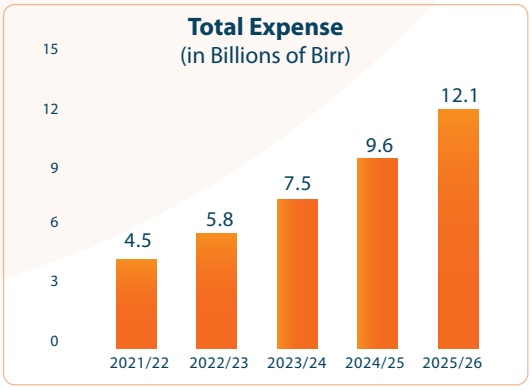


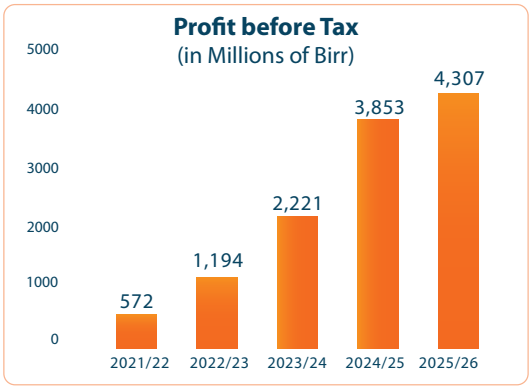




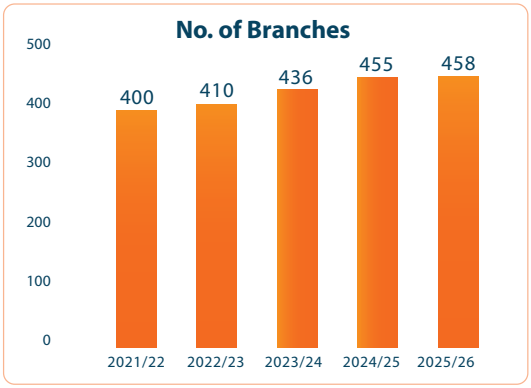


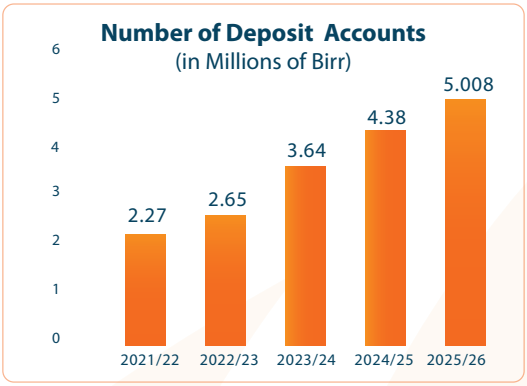


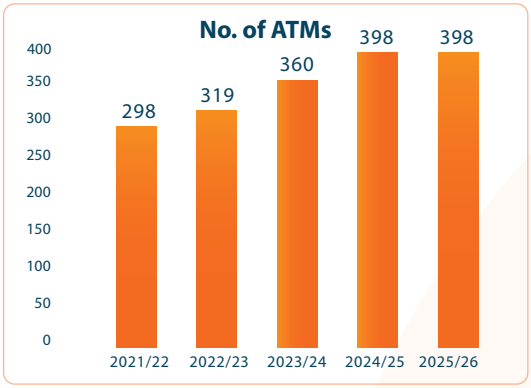


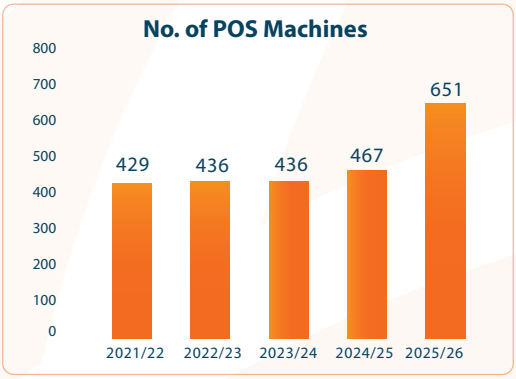


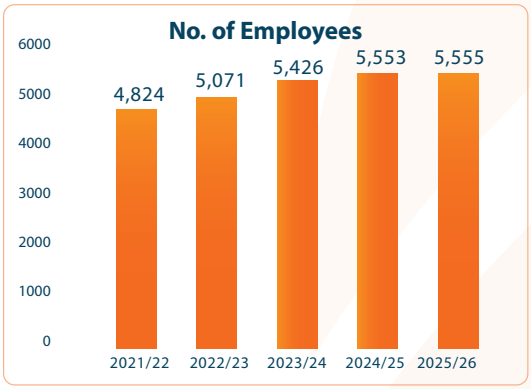
Wegagen Bank S.C
Annual Financial Statement
For the Year Ended 30 June 2026











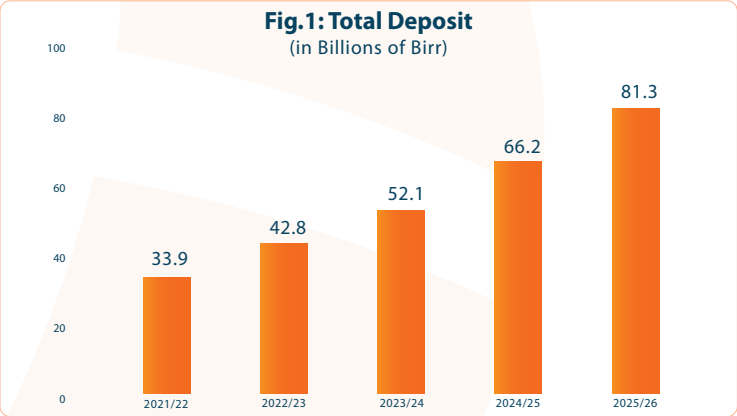
Wegagen Bank S.C
Annual Financial Statement
For the Year Ended 30 June 2026

1. OPERATIONAL PERFORMANCE

1.1 Deposit Mobilization

During FY 2025/26, the Bank mobilized net additional deposits of Birr 15.1 billion, increasing the outstanding deposit balance from Birr 66.2 billion to Birr 81.3 billion as of June 30, 2026. This represented year-on-year growth of approximately 23%.

The registered growth in deposit was supported by the Bank's continued focus on customer acquisition and retention, expansion of product and service offerings, and strengthened partnerships with key stakeholders. The Bank also continued to strengthen accessibility through its branch network and digital service channels.



The Bank continued to record year-on-year growth across all deposit sources. This success stemmed from the Bank's continued emphasis on expanding its retail market segment, strengthening customer relationships and providing accessible financial services through both conventional and digital channels.

1.2 Interest Free Banking Service

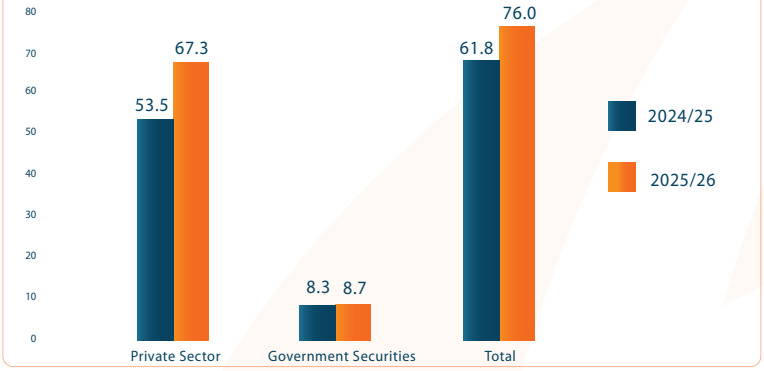
In line with its commitment to offering Interest Free Banking as a viable alternative service and bridging gaps left by conventional banking, a net deposit of Birr 143 million was mobilized during the fiscal year, reflecting a 3% year-on-year growth. Thus, outstanding interest free banking deposits reached to Birr 4.9 billion as of June 30, 2026. This performance was driven by a strategic reorganization focused on expanding customer access through full-fledged IFB branches, partitioned IFB sub-branches, and dedicated service windows, reinforcing the Bank's role in broadening financial inclusion.

Wegagen Bank S.C
Annual Financial Statement
For the Year Ended 30 June 2026

1.3 Loans and Advances

The Bank's steadfast commitment to fostering economic development through strategic lending initiatives expanded its gross loan portfolio to Birr 67.3 billion as of June 30, 2026, reflecting a 26% growth compared to last year same period. The Bank's holdings of debt securities also increased during the year to Birr 8.7 billion, contributing to the overall growth of its earning-asset portfolio. These advancements underscore the Bank's proactive approach to strengthening its investment portfolio.

Fig.2: Comparison of Gross Loans and Investment Portfolio



The loan portfolio remained diversified across major economic sectors. Accordingly, Import financing represented the largest share of the portfolio at 22.2%, followed by Construction (19%), Export (18.2%), Domestic Trade and Services (15%), Manufacturing (13.4%) and Transport service (8.2%). The remainder was allocated to Digital lending (2%) and other miscellaneous sectors (2%). These allocations demonstrate the Bank's commitment to supporting a broad spectrum of industries, thereby enhancing economic growth.

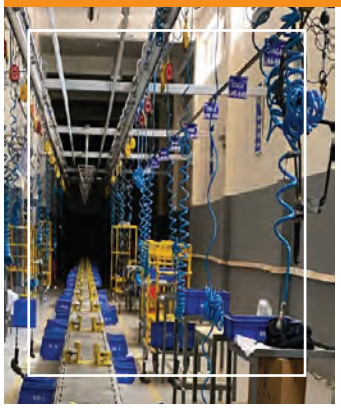
Financed Projects

Import

Manufacturing



Export

Construction

Wegagen Bank S.C
Annual Financial Statement
For the Year Ended 30 June 2026

1.4 International Banking Operations

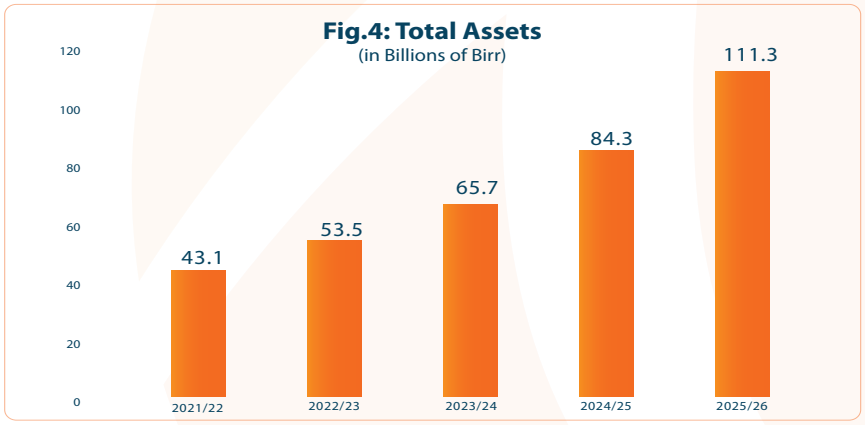
The Bank generated a foreign exchange inflow of USD 366 million during the FY 2025/26, reflecting 34% increase compared to the preceding fiscal year. The growth reflects the Bank's continued efforts to strengthen foreign currency mobilization and expand its engagement in international banking activities.

Export proceeds accounted for 35% of total foreign-exchange inflows, followed closely by FX market dealings and remittances which contributed 32% and 31%, respectively. Cash purchases and card related inflows represented the remaining 2%. This balanced mix highlights the Bank's diversified sources of foreign currency generation and its resilience in navigating dynamic market conditions.

2. FINANCIAL PERFORMANCE

2.1 Asset Expansion

At the close of the 2025/26 fiscal year, the Bank's total assets expanded by 32% year-on-year to reach Birr 111.3 billion, up from Birr 84.3 billion in the previous period. Loans and advances remained the largest component of the Bank's asset portfolio, accounting for 58% of the total assets. Cash and bank balances represented for 20.3%, maintaining operational liquidity, while investment securities (equity and debt) and placements with financial institutions comprised 10.1%. Likewise, property, plant, and equipment made up 3.5%, with other assets accounting for the remaining balance.



Wegagen Bank Partners with IFC for Trade Finance Guarantee Facility and Provision of Advisory Service in Risk Management, Treasury and Trade Finance Functions

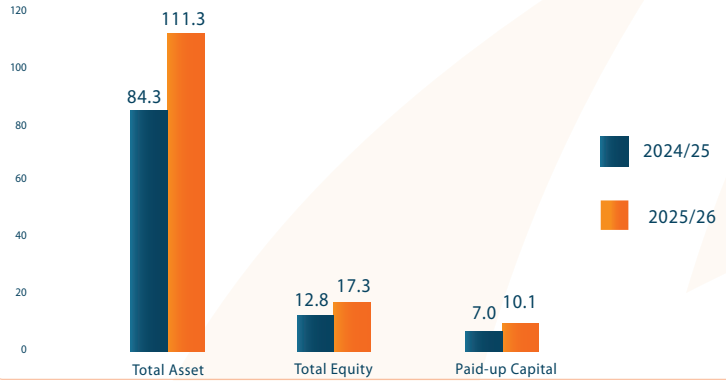
Wegagen Bank S.C
Annual Financial Statement
For the Year Ended 30 June 2026

2.2 Equity Growth

The Bank continued to strengthen its capital position during FY 2025/26. Total equity increased to Birr 17.3 billion from Birr 12.8 billion in the preceding fiscal year, representing 35% growth.

The main driver of this substantial growth is the significant Birr 3.1 billion increase in paid-up capital which stood at Birr 10.1 billion. This strong capital position bolsters the Bank's financial stability while enhancing the bank's ability to support future growth initiatives.

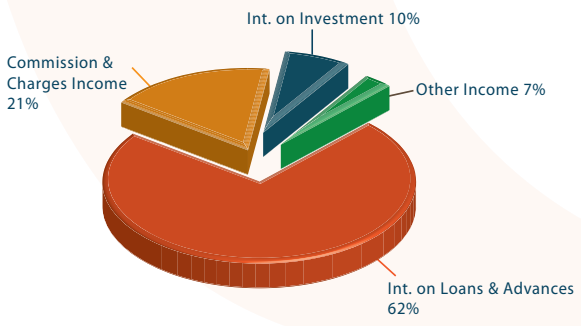
Fig.5: Comparison of Assets, Equity & Paid-up Capital



2.3 Total Income

The Bank generated total income of Birr 16.4 billion during FY 2025/26, compared with Birr 13.5 billion in the preceding year, representing a 21% increase. Interest on loans and advances accounted for 62% of the total income, highlighting the Bank's strong lending activities. Likewise, commission and charges represented for 21%, indicating a successful diversification of income sources through fee-based services. Moreover, interest on investments contributed 10%, showcasing the Bank's prudent investment strategies while other income sources accounted for the remaining share.

Fig.6: Composition of Total Income

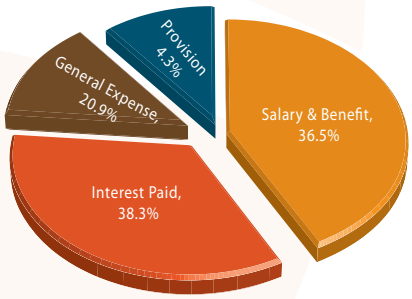


2.4 Total Expense

During the fiscal year 2025/26, the Bank's total expenses stood at Birr 12.1 billion, representing a 25% growth from Birr 9.6 billion in the prior year. All expense categories registered an increase in cost primarily attributed to the Bank's expansion and increased operational activities.

Interest Expense, which indicates the Bank's cost of funding, emerged as the largest component of total expenses accounting for 38.3% of expenditure followed by employee salary & benefits, which constituted 36.5% of total expenses, indicating the Bank's commitment to attracting and retaining talent in a competitive labour market. Overall, the increase in expenses signifies the Bank's strategic investments in human resources and operational capabilities to support its growth objectives.

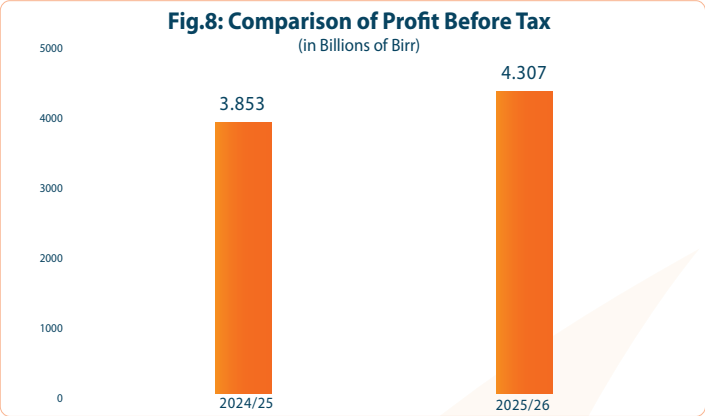
Fig. 7 Composition of the Total Expense



2.5 Profit before Tax

During the fiscal year, the Bank secured a Profit before tax of Birr 4.3 billion marking an increase of 12% compared to the preceding year's profit of Birr 3.85 billion. This performance exhibits the Bank's effective strategic initiatives and operational efficiencies that have driven revenue growth while managing expenses within tight regulatory environment and highly competitive landscape. The growth in profitability can be attributed to a combination of factors, including robust income generation from lending activities, a diversified income portfolio, and prudent cost management practices. While growth was modest, the result demonstrates the Bank's resilience in a competitive market and its potential for future investments and shareholder returns.

Wegagen Bank S.C
Annual Financial Statement
For the Year Ended 30 June 2026



3. Customer Base Expansion

During the fiscal year 2025/26, the Bank made substantial progress in expanding its customer base and accelerating digital adoption. Driven by effective acquisition and retention strategies, the Bank added 639,038 new deposit accounts (a 15% increase year-on-year) bringing its total customer base to 5,008,156 accounts.

This customer growth was accompanied by strong momentum across digital banking channels. Mobile banking subscriptions increased by 21% to reach 4,087,775, while internet banking subscriptions experienced remarkable growth of 86%, totaling 41,494. Furthermore, the number of cardholders grew by 45% to 537,651, reinforcing the Bank's commitment to diverse and accessible payment solutions.

Strategic initiatives further strengthened the Bank's digital ecosystem, highlighted by the successful launch of a digital wallet partnership with E-Birr. This collaboration expanded service delivery to 664,347 E-float accounts and established a network of 7,445 agents, solidifying the Bank's competitive position within the evolving financial technology landscape.

During the 2025/26 fiscal year, the Bank expanded its digital payment ecosystem by onboarding 485 new institutional partners. This expansion comprised 185 schools, 158 health centers, 61 entities across unions, cooperatives, and rental utility services, 43 SACCOs and 38 water and sanitation offices.

4. Accessibility

During the 2025/26 fiscal year, the Bank took big steps in growing its network by opening 9 new branches in different regions, while closing 6 underperforming ones and merging them with nearby high-performing branches. This shift was part of a strategy to scale back physical expansion and focus more on digital banking. As a result, by June 30, 2026, the total branch count of the bank stood at 458, reflecting the Bank's commitment to serving customers through both digital and physical channels.

Alongside its branches, the Bank also served customers through 398 ATMs nationwide, offering greater convenience and 24/7 access to cash and banking services. The Bank also made a strong push in expanding its Point of Sale (POS) network, adding 184 new machines during the fiscal year to reach a total of 651 by the end of the period.

The Bank's agent and merchant network experienced robust growth to reaching 7,445 and 15,665, respectively, at the end of the fiscal year. This growth supports cashless transactions, helps local businesses, and strengthens the Bank's digital presence. Together, these moves show the Bank's focus on improving customer experience and keeping up with the changing market.

5. Human Capital

Strategic investment in human capital remained a cornerstone of the Bank's performance and competitive edge throughout the 2025/26 fiscal year. The Bank continued to focus on building the technical, managerial and leadership capabilities required to support its evolving business model and strategic priorities. These comprehensive technical and professional training initiatives have reinforced a robust culture of continuous learning, equipping personnel with the expertise required to navigate an increasingly dynamic market landscape.

Diversity and strategic inclusion further define the Bank's organizational strength. As of June 30, 2026, total staff strength including contract personnel stood at 5,555, reflecting a demographic balance of 63% male and 37% female employees. Moreover, the Bank maintained its targeted commitment to empowering female professionals, actively applying affirmative measures and clear career pathways to elevate women into leadership roles. By aligning talent development with equitable opportunity, the Bank continues to build an innovative, future ready workforce positioned to drive operational excellence.

6. Banking Technology

The Bank significantly accelerated its IT and digital banking capabilities during the fiscal year, achieving substantial growth in both transaction volume and value across its core channels, including ATMs, POS terminals, mobile banking, and internet banking. This expansion underscores the bank's commitment to digital excellence and its capacity to serve an increasingly tech-reliant customer base. To safeguard this growth, proactive enhancements were made to the information security architecture, reinforcing data confidentiality, integrity, and operational resilience against evolving cyber threats. Complementing these technical upgrades, the IT support team efficiently resolved a high volume of internal and external support requests, driving operational efficiency and ensuring seamless user experiences across all digital touch points.

Wegagen Bank S.C
Annual Financial Statement
For the Year Ended 30 June 2026

7. Investment in Property

The Bank continued to execute its strategic property acquisition model, transitioning from rental facilities to owned assets to optimize long-term operational costs and anchor its physical presence in key economic hubs. A primary milestone in this regional expansion is the construction of a modern 25 story regional headquarters situated on a 3,500-square-meter plot in Mekelle. Designed to integrate advanced technology with contemporary amenities, the facility will serve as an efficient, customer-centric hub for local operations while supporting regional financial development. To secure seamless execution and maintain rigorous quality standards, the Bank partnered with an established primary contractor. This milestone investment underscores a broader commitment to sustainable infrastructure growth, strengthening local service delivery and deepening community engagement across key regional markets.

8. Risk and Compliance Management

To maintain long-term sustainability amidst a volatile financial landscape, the Bank prioritized the comprehensive enhancement of its enterprise risk management framework during the fiscal year. This initiative involved a systematic review of all underlying policies, procedures, and governance practices to embed a proactive, bank-wide risk culture. By empowering staff at all operational levels to identify and address potential vulnerabilities, the updated framework ensures that risk consciousness is fully integrated into daily operations.

This strategic overhaul has significantly strengthened institutional oversight, providing the Board of Directors with enhanced tools to monitor risk exposure in direct alignment with established risk appetites and corporate objectives. At the executive level, clear guidelines now support informed, data-driven decision-making that meets both national and international regulatory standards. Consequently, the Bank successfully mitigated key compliance risks and maintained operational integrity throughout the reporting period, reinforcing stakeholder confidence and establishing a resilient foundation for sustainable growth.

9. Internal Audit

The internal audit function remains central to the Bank's governance architecture, providing independent assurance and advisory services to safeguard operational integrity and drive continuous process improvements. Operating under a mandate of strict objectivity, the department monitors compliance with internal policies and regulatory standards, promoting high levels of transparency and accountability across all business units.

Throughout the 2025/26 fiscal year, the Bank executed a comprehensive, risk-based audit plan covering both head office functions and the branch network. This systematic review evaluated the overall effectiveness of internal controls and identified key operational areas for enhancement. Beyond routine coverage, the audit team conducted targeted

Wegagen Bank Signs Five Year Growth Partnership Agreement with VISA Inc. to Enhance its International Card Banking Service

Wegagen Bank S.C
Annual Financial Statement
For the Year Ended 30 June 2026

investigations into reported fraud cases, demonstrating a zero-tolerance approach to misconduct and reaffirming the Bank's commitment to institutional trustworthiness.

All findings and strategic recommendations from internal audits were systematically documented and presented to the relevant governing bodies, ensuring active engagement and accountability across executive leadership. In response to these evaluations, management developed and initiated targeted action plans to address identified operational gaps. This proactive implementation process resolves existing control shortcomings while reinforcing the Bank's broader risk management framework, fostering operational resilience, and embedding a culture of continuous institutional improvement.

10. Environment, Social, and Governance (ESG)

In 2025/26, Wegagen Bank further embedded sustainability into its operation, supporting resilient growth, responsible finance and stakeholder confidence. The Bank strengthened ESG governance, expanded inclusive digital and agricultural finance, protected customers and systems, invested in people and communities, and improved the foundation for sustainability and climate reporting.

10.1 Environmental Impact

Climate related Risk and Resilient Finance

The Bank is preparing to deepen its response to physical and transition climate risks that may affect borrowers, collateral, operations and demand. Climate-smart agriculture, renewable energy, resource efficiency and resilient finance have been identified as areas for responsible growth.

Cleaner Mobility and Operational Energy Efficiency

Cleaner-mobility finance during the year reached Birr 70.24 million for electric vehicles serving customers and Bank operations. The Bank also replaced some of its watt fluorescent lamps with 48-watt LED panels and installed hybrid inverters at selected branches.

Waste Recovery and Circularity

The Bank availed used paper for reuse and recycling through "Ande Mama", a women-led waste-to-value company. In doing so, it was ensured that confidential documents were securely destroyed before processing.

10.2 Social Impact

Inclusive and Responsible Digital Finance

Digital finance remained a leading sustainability contribution. Efoyta digital lending recorded Birr 5.99 billion in disbursements during the fiscal year, with significant financing being availed to women, youth and MSMEs. The Bank also launched Efoyta Le-Gebere to provide financing for agricultural inputs and address working-capital requirements in the agricultural sector. The digital finance of the Bank has notable social impact as it promotes access to finance and fosters inclusion.

Agriculture and Rural Livelihoods

With the aim of enhancing agricultural growth and improving rural livelihood, the Bank disbursed a total of Birr 589.9 million to agricultural sector during the fiscal year under review. Part of the disbursement was done through the Bank's digital lending platform, of which Birr 166.7 million was channeled to 2,660 beneficiaries engaged in apiculture while Birr 245.2 million was channeled to 3,308 beneficiaries engaged in animal fattening and poultry.

Financial Literacy Training

The Bank delivered 36 financial literacy training session to 14,288 participants across rural and urban areas. The Bank also took part in the financial literacy week organized by the National Bank of Ethiopia. In conjunction, the Bank also organized its own digital financial literacy campaign nationwide.

Workforce Diversity, Development and Progression

As of June 30 2026, Wegagen Bank employed 5,555 individuals of which 2,055 (37%) are female and the remaining 3,500 (63%) are male. During the fiscal year, 286 new employees joined the Bank while internal recruitment filled 74% of vacant posts. Moreover, female employees represented 43% of the succession pool and held 95 (16%) of managerial and supervisory roles.

Development initiatives strengthened the leadership pipeline. 22 junior female employees joined NEWFin while 98 female managerial employees joined AWIB development program. Likewise, 89 female managerial and professional employees completed leadership training. The Bank also rotated 25 high-potential employees, inducted 259 graduates and delivered 80 various training programmes.

Corporate Social Responsibility (CSR)

Corporate social responsibility expenditure reached Birr 81.4 million during the fiscal year under review, supporting humanitarian and disaster relief, health, education, youth development, community infrastructure, food support and other priorities. Financial-literacy programmes and the Ande Mama partnership extended this contribution.

Wegagen Bank S.C
Annual Financial Statement
For the Year Ended 30 June 2026

10.3 Governance

A dedicated ESG Division coordinated the implementation, monitoring and disclosure, while the Board, Senior Management and relevant functions provided oversight and subsequently translated ESG policy into financing, operations and customer service. Sustainability is embedded in the five-year strategic plan, with attention to financial inclusion, expanding responsible digital banking services, Women-focused lending, MSMEs, agriculture, partnerships and ESG-informed decisions.

Strong governance underpins the Bank's ESG practice, embedding sustainability into decision-making, risk management, and strategic planning through a transparent and accountable framework. The Board of Directors, supported by the Risk and Compliance Sub-Committee in line with NBE Directive SBB 91/2024, oversaw sustainability-related risks and ensures environmental and social considerations were integrated across operations. Active involvement of the Board and Senior Management reinforced regulatory compliance, stakeholder confidence, and alignment with long-term objectives.

As of June 30, 2026, total loan and advance transactions with related parties amounted to Birr 2.3 billion, while deposit transactions totalled Birr 985 million. Annual compensation paid to key management reached Birr 40 million, in line with the Bank's governance and disclosure practice.

Report of the Directors

The directors submit their report together with the financial statements for the year ended 30 June 2026, to the members of Wegagen Bank ("Wegagen or the Bank"). This report discloses the financial performance and state of affairs of the Bank.

Incorporation and address

Wegagen Bank S.C was established on June 11, 1997. It came into being with 16 founding members who recognized the critical role that financial institutions would play in creating sustainable economic development and raised an initial capital of Birr 30 million. As of June 30, 2026, the Bank's paid-up capital reached Birr 10.09 billion. As at June 30, 2026, the Bank has 15,598 shareholders and a network of 458 branches.

Principal activities

The mandate of the Bank is to provide efficient and effective full-fledged commercial banking services by utilizing qualified, honest and motivated staff and state-of-the-art technology and thereby optimize shareholders interest.

Results and Earnings

The Bank's results for the year ended 30 June 2026 are set out on page 32 and 119. The profit for the year has been transferred to retained earnings. The summarized results are presented below.

	Consolidated		Separate	
	30-Jun-2026 Birr'000	30-Jun-2025 Birr'000	30-Jun-2026 Birr'000	30-Jun-2025 Birr'000

Statement of Directors' Responsibilities

In accordance with the Financial Reporting Proclamation No. 847/2014 the Accounting and Auditing Board of Ethiopia (AABE) may direct the Bank to prepare financial statements in accordance with International Financial Reporting Standards, whether their designation changes or they are replaced, from time to time.

The Directors are responsible for the preparation and fair presentation of these financial statements in conformity with International Financial Reporting Standard and in the manner required by the Accounting and Auditing Board of Ethiopia, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. The Bank is required keep such records are necessary to:

a. Exhibit clearly and correctly the state of its affairs;
b. Explain its transactions and financial position; and
c. Enable the National Bank to determine whether the Bank had complied with the provisions of the banking business proclamation and regulations and directives issued for the implementation of the aforementioned proclamation.

The Directors accepts responsibility for the annual financial statement, which have been prepared using appropriate accounting policies supported by reasonable and prudent judgments and estimates, in conformity with International Financial Reporting Standards, Banking Business Proclamation, Commercial code of 2013 E.C and the relevant Directives issued by the National Bank of Ethiopia.
The Directors are the opinion that the financial statements give a true and fair view of the state of the financial affairs of the company and of its profit or loss.

The Directors further accept responsibility for the maintenance of accounting records that may be relied upon in the preparation of financial statements, as well as adequate systems of internal financial control.

Nothing has come to the attention of the directors to indicate that the company will not remain a going concern for at least twelve months from the date of this statement.

The financial statements from pages 32 to 140 were approved and authorized for issue by the board of directors and management on September 04, 2026, and signed on their behalf by:

Mr. Abdishu Hussien
Chairman, Board of Directors

INDEPENDENT AUDITOR'S REPORT ON THE ACCOUNTS OF WEGAGEN BANK SHARE COMPANY

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Wegagen Bank Share Company specified on pages 7 to 110, which comprise the statement of financial position as at 30 June 2026, the statement of profit or loss and other comprehensive income, the statement of cash flows and the statement of changes in equity for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at 30 June 2026, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis for Opinion

we conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA Code), together with the ethical requirements that are relevant to our audit of financial statements in Ethiopia, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

As described in note 16 to the financial statements, the impairment losses have been determined in accordance with IFRS 9 Financial Instruments. This was considered a key audit matter as IFRS 9 is a complex accounting standard which requires significant judgment to determine the impairment losses.

IFRS 13 fair value measurement requires entities to measure fair value using observable inputs whenever possible, and unobservable inputs only when observable inputs are not available. In the case of the Bank's investment in other entities, the Bank has determined that there are no observable inputs available to measure fair value. Therefore, the Bank has used a valuation model that incorporates unobservable inputs, such as the discount rate and future cash flows.

Tel. 251-011-8961752 /011 6180638 Mob. 0911 229425 /0930 034356/0930 034357 Fax: 251-011 662 12 70/60
E-mail:- tafessef@gmail.com / tafessef@hotmail.com P.O.Box 110690 Addis Ababa - Ethiopia

The use of unobservable inputs in the valuation model poses a risk of material misstatement, as the Bank's judgment in determining these inputs could be biased or inaccurate. We have identified this as a key audit matter because of the following factors:

- The Bank's investment in other entities is significant, is material to the financial statements.
- The valuation of the investment is complex and requires the use of a number of unobservable inputs.

To address this key audit matter, we have performed the following audit procedures:

- We assessed the Bank's valuation methodology and evaluated the reasonableness of the key assumptions used in the valuation model.
- We compared the Bank's valuation results to those of independent market participants.

Based on our audit procedures, we believe that the Bank's valuation of its investment in other entities is reasonable and in accordance with IFRS 13. However, we recommend that the Bank consider the following actions to mitigate the risk of material misstatement in the future:

- Consider using a valuation methodology that incorporates more observable inputs.
- Regularly monitor the performance of the investment and update the valuation model as needed.

Other Information

The Directors are responsible for the other information, which comprises the Directors' report in accordance with Article 315(6)(c) of the Commercial Code of Ethiopia of 2021. Our opinion on the financial statements does not cover the other information and we do not express any form of assurance or conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the audit work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Directors for the Financial Statements

The Directors are responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards (IFRSs), and for such internal control as the Directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so. The Directors are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Report on Other Legal and Regulatory Requirements

We have no comment to make on the report of your Board of Directors so far as it relates to these financial statements and, in accordance with the Commercial Code of Ethiopia of 2021 (Proclamation No. 1243/2021), we recommend approval of the financial statements. In addition, we have no objection to the amount of dividend proposed by the directors and hence, in accordance with article 349(3) of the Commercial Code of Ethiopia of 2021, we recommend approval of the proposed dividend distribution.

Net cash (outflow)/inflow from financing activities		**952,477**	**87,697**
Net increase/(decrease) in Cash and bank balances		**7,526,485**	**1,881,875**
Cash and bank balances at the beg. of the year	14	15,030,282	13,123,499
Effect of exchange rate movement on cash and cash equivalent		13,084	24,908
Cash and bank balances at the end of the year		**22,569,852**	**15,030,282**

The accompanying notes are an integral part of these financial statements. The financial statements were approved and authorized for issue by the directors and management on September 04, 2026, and signed on their behalf by:

Mr. Abdishu Hussien
Chairman, Board of Directors

Aklilu Wubet (PhD)
Chief Executive Officer

Wegagen Bank S.C
Annual Consolidated and Separate Financial Statements
For the Year Ended 30 June 2026

Notes to the Consolidated Financial Statements for the Reporting Period Ended June 30 2026

1. General information

Wegagen Bank S.C. (Wegagen Bank or the Bank) is a private commercial Bank that was established in June 1997 in accordance with the provisions of the Commercial Code of Ethiopia of 1960 (which was later replaced by the Commercial Code of Ethiopia of 1243/2021) and the Licensing and Supervision of Banking Business Proclamation No. 84/1994 (as amended by 1360/2025). As at June 30, 2026, the paid up capital of the Bank reached Birr 10.09 billion contributed by 15,598 shareholders.

The Bank's registered office is at Kirkos Sub-City, Wereda 10, in front of the National Stadium, in Addis Ababa, Ethiopia. Besides, it operates in all twelve regions and two city administrations of Ethiopia by opening 458 branches.

The Bank is principally engaged in the provision of diverse range of financial services ranging from accepting deposits from the public and lending to a wide range of sectors that mainly includes manufacturing, import, export, construction, domestic trade and transport areas. It also performs trade services activities to facilitate the import and export process of the Country. Moreover, it facilitates local and international remittance activities through various partners. Last but not least, the Bank reaches its customers through various electronic banking channels like ATM, internet banking, mobile banking, mobile wallet and agency banking platforms.

2. Summary of Significant Accounting Policies

2.1 Introduction to summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.2 Basis of preparation

The financial statements for the year ended 30 June 2026 have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). The financial statements comprise the statement of profit or loss and other comprehensive income, the statement of financial position, the statement of changes in equity, the statement of cash flows and the notes to the financial statements.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates, assumptions and management judgment in applying the Bank's accounting policies. Changes in estmates and assumptions may have a significant impact on the financial statements in the period the assumptions changed. Management believes that the underlying estimates and assumptions are appropriate and that the Bank's financial statements therefore present the financial position and results fairly. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in Note 3.

2.2.1 Going Concern

The financial statements have been prepared on a going concern basis as the management have no doubt that the Bank would remain in existence after 12 months.

2.2.2 Changes in accounting policies and disclosures

The Bank has consistently applied the accounting policies to all periods presented in these financial statements. The following are amendments to standards that are effective for annual periods beginning after 30 June 2026, and have not been applied in preparing these financial statements.

Standard	Description	Effective date	Impact
IFRS S1 General Requirements for Disclosure of Sustainability-Related Financial Information and IFRS S2 Climate-related Disclosures	IFRS S1 sets out general requirements for the disclosure of material information about sustainability-related financial risks and opportunities and other general reporting requirements. IFRS S2 sets out disclosure requirements that are specific to climate-related matters. These standards were developed in response to requests from primary users of general-purpose financial reporting for more consistent, complete, comparable and verifiable sustainability-related financial information to enable them to assess an entity's enterprise value. The standards will require disclosure of information about an entity's impacts and dependencies on people, the planet and the economy to meet the needs of primary users of general-purpose financial information.	Voluntary - Effective for periods starting on or after 1 January 2024. Endorsed in July 2026 by the Accounting and Auditing Board of Ethiopia"	The bank may apply it when it is application on or after the effective date.
Translation to a Hyperinflationary Presentation Currency – Amendments to IAS 21	"The amendments to IAS 21 require translation from a non-hyperinflationary functional currency into a hyperinflationary presentation currency at the closing rate. An entity whose functional currency and presentation currency are the currency of a hyperinflationary economy restates the comparative amounts of a foreign operation, whose functional currency is that of a non-hyperinflationary economy, by applying the general price index, in accordance with paragraph 34 of IAS 29, to the foreign operation's comparative figures"	Effective for annual periods beginning on or after 1 January 2027, but may be applied earlier.	The bank may apply it when it is application on or after the effective date.

Wegagen Bank S.C
Annual Consolidated and Separate Financial Statements
For the Year Ended 30 June 2026

Standard	Description	Effective date	Impact
IFRS 19 Subsidiaries without Public Accountability: Disclosures	This new standard works alongside other IFRS Accounting Standards. An eligible subsidiary applies the requirements in other IFRS Accounting Standards except for the disclosure requirements and instead applies the reduced disclosure requirements in IFRS 19. IFRS 19's reduced disclosure requirements balance the information needs of the users of eligible subsidiaries' financial statements with cost savings for preparers. IFRS 19 is a voluntary standard for eligible subsidiaries.A subsidiary is eligible if:it does not have public accountability; and it has an ultimate or intermediate parent that produces consolidated financial statements available for public use that comply with IFRS Accounting Standards.	Effective from annual reporting periods beginning on or after 1 January 2027	The bank may apply it when it is application on or after the effective date.
IFRS 18 Presentation and Disclosure in Financial Statements	This is the new standard on presentation and disclosure in financial statements, with a focus on updates to the statement of profit or loss. The key new concepts introduced in IFRS 18 relate to:the structure of the statement of profit or loss;required disclosures in the financial statements for certain profit or loss performance measures that are reported outside an entity's financial statements (that is, management-defined performance measures); andenhanced principles on aggregation and disaggregation which apply to the primary financial statements and notes in general.	Effective for annual reporting periods beginning on or after 1 January 2027.	The bank may apply it when it is application on or after the effective date.
IFRS 20 - Regulatory Assets and Regulatory Liabilities	It sets out the requirements for the recognition, measurement, presentation and disclosure of regulatory assets, regulatory liabilities, regulatory income and regulatory expense. It introduces requirements that will result in information that supplements the information an entity already provides by applying IFRS accounting standards, such as IFRS 15. Such information enables users of financial statements to understand the total allowed compensation for regulatory goods or services supplied in each reporting period and the related rights and obligations.	Effective for annual periods beginning on or after 1 January 2029	The bank may apply it when it is application on or after the effective date.

2.3 Foreign currency translation

a. Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the Bank operates ('the functional currency'). The functional currency and presentation currency of the Bank is the Ethiopian Birr (Birr).

b. Transactions and Balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from the translation at exchange rates of monetary assets and liabilities denominated in currencies other than the Bank's functional currency are recognised in profit or loss within other operating income or loss. Monetary items denominated in foreign currency are translated using the closing rate as at the reporting date with monetray assets translated at selling rate and monetary liabilities at buying rate.

2.4 Recognition of income and expenses

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Bank and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duty.

The Bank, earns income from interest on loans and commission and sevice charges from the various services it provides to customers. The Bank's main expenses includes the interest it paid to deposits from customers, the impairment allowance for loans and the operating expenses it incurs to run the day to day operations of the Bank.

2.4.1 Net Interest Income

2.4.1.1. Policy applicable

a. Effective interest rate and amortized cost

Interest income and expense are recognized in profit or loss using the effective interest method. The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to the gross carrying amount of the financial asset; or the amortized cost of the financial liability. When calculating the effective interest rate for financial instruments other than credit-impaired assets, the Bank estimates future cash flows considering all contractual terms of the financial instrument, but not expected credit losses. For credit-impaired financial assets, a credit-adjusted effective interest rate is calculated using estimated future cash flows including expected credit losses. The calculation of the effective interest rate includes transaction costs and fees and points paid or received that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or financial liability

Wegagen Bank S.C
Annual Consolidated and Separate Financial Statements
For the Year Ended 30 June 2026

b. Amortized cost and gross carrying amount

The 'amortized cost' of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any expected credit loss allowance. The 'gross carrying amount of a financial asset' is the amortized cost of a financial asset before adjusting for any expected credit loss allowance.

c. Calculation of interest income and expense

In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortized cost of the liability. However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the amortized cost of the financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis. For financial assets that were credit-impaired on initial recognition, interest income is calculated by applying the credit-adjusted effective interest rate to the amortized cost of the asset. The calculation of interest income does not revert to a gross basis, even if the credit risk of the asset improves.

d. Presentation

Interest income and expense presented in the statement of profit or loss and OCI include

- interest on financial assets and financial liabilities measured at amortized cost calculated on an effective interest basis;
- interest on debt instruments measured at FVTPL calculated on an effective interest basis;

Interest income and expense on all trading assets and liabilities are considered to be incidental to the Bank's trading operations and are presented together with all other changes in the fair value of trading assets and liabilities in net trading income. Interest income and expense on other financial assets and financial liabilities at FVTPL are presented in net income from other financial instruments at FVTPL.

2.4.2 Fees and commission

Fees and commission income and expenses that are integral to the effective interest rate on a financial asset or liability are included in the measurement of the effective interest rate. Other fees and commission income (for example commission on drafts, cash payment order (CPO), letter of credit (LC), letter of guarantee, etc) are recognised as the related services are performed.

When a loan commitment is not expected to result in the draw-down of a loan, loan commitment fees are recognised on a straight-line basis over the commitment period.

Other fees and commission expenses relates mainly to transaction and service fees and they are expensed as the services are received.

2.4.3 Dividend income

This is recognised when the Bank's right to receive the payment is established, which is generally when the shareholders of the investee company approve and declare the dividend.

2.4.4 Foreign exchange revaluation gains or losses

These are gains and losses arising on settlement and translation of monetary assets and liabilities denominated in foreign currencies at the functional currency's spot rate of exchange at the reporting date. The monetary assets and liabilities include financial assets within the foreign currencies deposits received and held on behalf of third parties etc.

2.4.5 Other income and expense

Other expenses are recognized when they are incurred by the Bank and other revenues recognized when they are earned which usually occurs simulatneously with cash colection.

2.5 Financial instruments

a. Recognition and initial measurement

The Bank shall initially recognize loans and advances, deposits, debt securities issued and subordinated liabilities on the date on which they are originated. All other financial instruments (including regular-way purchases and sales of financial assets) shall be recognized on the trade date, which is the date on which the Bank becomes a party to the contractual provisions of the instrument. A financial asset or financial liability shall be measured initially at fair value plus, for an item not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue.

b. Classification and subsequent measurement

Financial assets- On initial recognition, a financial asset shall be classified either as measured at either amortized cost, fair value through other comprehensive income (FVOCI) or fair value through profit or loss (FVTPL). The Bank shall measure a financial asset at amortized cost if it meets both of the following conditions and is not designated at FVTPL:

- the asset is held within a business model whose objective is to hold it to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI).

A debt instrument shall be measured at FVOCI only if it meets both of the following conditions and is not designated at FVTPL:

- the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are SPPI.

On initial recognition, an equity investment that is held for trading shall be classified at FVTPL. However, for equity investment that is not held for trading, the Bank may irrevocably elect to present subsequent changes in fair value in other comprehensive income (OCI). This election is made on an investment-by-investment basis.

All other financial assets that do not meet the classification criteria at amortized cost or FVOCI above, shall be classified as measured at FVTPL.

Wegagen Bank S.C
Annual Consolidated and Separate Financial Statements
For the Year Ended 30 June 2026

In addition, on initial recognition, the Bank may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortized cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Business model assessment- The Bank shall make an assessment of the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management's strategy focuses on earning contractual interest revenue, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of the liabilities that are funding those assets or realizing cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Bank's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and its strategy for how those risks are managed;
- How managers of the business are compensated (e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected); and

The frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about future sales activity. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Bank's stated objective for managing the financial assets is achieved and how cash flows are realized.

Financial assets that are held for trading or managed and whose performance is evaluated on a fair value basis shall be measured at FVTPL because they are neither held to collect contractual cash flows nor held both to collect contractual cash flows and to sell financial assets.

Financial assets shall not be reclassified subsequent to their initial recognition, except in the period after the Bank changes its business model for managing financial assets.

Assessment of whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' shall be defined as the fair value of the financial asset on initial recognition. 'Interest' shall be defined as the consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as profit margin.

In assessing whether the contractual cash flows are SPPI, the Bank considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making the assessment, the Bank considers:

- contingent events that would change the amount and timing of cash flows;
- leverage features;
- prepayment and extension terms;
- terms that limit the Bank's claim to cash flows from specified assets (e.g. non-recourse loans); and
- features that modify consideration of the time value of money (e.g. periodical reset of interest rates).

Financial liabilities

The Bank shall classify its financial liabilities, other than financial guarantees and loan commitments, as measured at amortized cost or FVTPL.

A financial guarantee is an undertaking/commitment that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified party fails to meet its obligation when due in accordance with the contractual terms.

Financial guarantees issued by the Bank are initially measured at their fair values and, if not designated as at FVTPL, are subsequently measured at the higher of: the amount of the obligation under the guarantee, as determined in accordance with IAS 37 Provisions, Contingent Liabilities and Contingent Assets; and the amount initially recognized less, where appropriate, cumulative amortization recognized in accordance with the revenue recognition policies.

c. Impairment

At each reporting date, the Bank shall assess whether there is objective evidence that financial assets (except equity investments), other than those carried at FVTPL, are impaired. The Bank shall recognize loss allowances for expected credit losses (ECL) on the following financial instruments that are not measured at FVTPL:

- financial assets that are debt instruments;
- lease receivables;
- financial guarantee contracts issued; and
- loan commitments issued.

No impairment loss shall be recognized on equity investments.

The Bank shall measure loss allowances at an amount equal to lifetime ECL, except for the following, which are measured as 12-month ECL:

- debt investment securities that are determined to have low credit risk at the reporting date; and
- other financial instruments (other than lease receivables) on which credit risk has not increased significantly since their initial recognition.

Wegagen Bank S.C
Annual Consolidated and Separate Financial Statements
For the Year Ended 30 June 2026

Loss allowances for lease receivables shall always be measured at an amount equal to lifetime ECL. 12-month ECL is the portion of ECL that result from default events on a financial instrument that are possible within the 12 months after the reporting date. Financial instruments for which a 12-month ECL is recognized are referred to as 'Stage 1 financial instruments'.

Life-time ECL is the ECL that result from all possible default events over the expected life of the financial instrument. Financial instruments for which a lifetime ECL is recognized but which are not credit-impaired are referred to as 'Stage 2 financial instruments'. Financial instruments that are credit impaired and for which a lifetime ECL is recognized are referred to as 'Stage 3 financial instruments'.

i. Measurement of ECL

it is probability-weighted estimate of credit losses & shall be measured as follows:

- for financial assets that are not credit-impaired at the reporting date (stage 1 and 2): as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the Bank in accordance with the contract and the cash flows that the Bank expects to receive);
- for financial assets that are credit-impaired at the reporting date (stage 3): as the difference between the gross carrying amount and the present value of estimated future cash flows;
- for undrawn loan commitments: as the present value of the difference between the contractual cash flows that are due to the Bank if the commitment is drawn down and the cash flows that the Bank expects to receive; and
- for financial guarantee contracts: as the expected payments to reimburse the holder less any amounts that the Bank expects to recover.

Where the terms of a financial asset are renegotiated or modified or an existing financial asset is replaced with a new one due to financial difficulties of the borrower, then the Bank shall assess whether the financial asset should be derecognized and ECL are measured as follows:

- If the expected restructuring will not result in derecognition of the existing asset, then the expected cash flows arising from the modified financial asset are included in calculating the cash shortfalls from the existing asset

- If the expected restructuring will result in derecognition of the existing asset, then the expected fair value of the new asset is treated as the final cash flow from the existing financial asset at the time of its derecognition. This amount is included in calculating the cash shortfalls from the existing financial asset that are discounted from the expected date of derecognition to the reporting date using the original effective interest rate of the existing financial asset.

The key inputs into the measurement of ECL are the term structure of probability of default (PD), loss given default (LGD); and exposure at default (EAD).

ECL for exposures in Stage 1 is calculated by multiplying the 12-month PD by LGD and EAD. Lifetime ECL is calculated by multiplying the lifetime PD by LGD and EAD.

Probability of Default (PD)-It provides an estimate of the likelihood that a borrower will be unable to meet its debt obligations. The methodology of estimating PDs.

ii. Significant increase in credit risk

When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, the Bank considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Bank's historical experience and expert credit assessment and including forward-looking information.

The objective of the assessment is to identify whether a significant increase in credit risk has occurred for an exposure by comparing:

- the remaining lifetime probability of default (PD) as at the reporting date; with the remaining lifetime PD for this point in time that was estimated at the time of initial recognition of the exposure (adjusted where relevant for changes in prepayment expectations).
- the Bank uses three criteria for determining whether there has been a significant increase in credit risk:

— quantitative test based on movement in PD;

— qualitative indicators; and

— a backstop of 30 days past due,

The Bank allocates each exposure to a credit risk grade based on a variety of data that is determined to be predictive of the risk of default and applying experienced credit judgement. Credit risk grades are defined using qualitative and quantitative factors that are indicative of risk of default. These factors vary depending on the nature of the exposure and the type of borrower.

Credit risk grades are defined and calibrated such that the risk of default occurring increases exponentially as the credit risk deteriorates so, for example, the difference in risk of default between credit risk grades 1 and 2 is smaller than the difference between credit risk grades 2 and 3. Each exposure is allocated to a credit risk grade on initial recognition based on available information about the borrower. Exposures are subject to ongoing monitoring, which may result in an exposure being moved to a different credit risk grade. The monitoring typically involves use of the following data;

a. Term loan exposures

— Information obtained during periodic review of customer files – e.g. audited financial statements, management accounts, budgets and projections. Examples of areas of particular focus are: gross profit margins, financial leverage ratios, debt service coverage, compliance

— Data from credit reference agencies, press articles, changes in external credit ratings

— Actual and expected significant changes in the political, regulatory and technological environment of the borrower or in its business activities

— Internally collected data on customer behaviour – e.g. utilisation of credit card facilities

— Affordability metrics

Wegagen Bank S.C
Annual Consolidated and Separate Financial Statements
For the Year Ended 30 June 2026

b. Overdraft exposures

— Payment record – this includes overdue status as well as a range of variables about payment ratios
— Utilisation of the granted limit
— Requests for and granting of forbearance
— Existing and forecast changes in business, financial and economic conditions

The maximum contractual period extends to the date at which the Bank has the right to require repayment of an advance or terminate a loan commitment or guarantee.
As described above, and subject to using a maximum of a 12-month PD for Stage 1 financial assets, the Bank measures ECL considering the risk of default over the maximum contractual period (including any borrower's extension options) over which it is exposed to credit risk, even if, for credit risk management purposes, the Bank considers a longer period. However, for overdrafts that include both a loan and an undrawn commitment component, the Bank measures ECL over a period longer than the maximum contractual period if the Bank's contractual ability to demand repayment and cancel the undrawn commitment does not limit the Bank's exposure to credit losses to the contractual notice period. These facilities do not have a fixed term or repayment structure and are managed on a collective basis. The Bank can cancel them with immediate effect but this contractual right is not enforced in the normal day-to-day management, but only when the Bank becomes aware of an increase in credit risk at the facility level. This longer period is estimated taking into account the credit risk management actions that the Bank expects to take, and that serve to mitigate ECL. These include a reduction in limits, cancellation of the facility and/or turning the outstanding balance into a loan with fixed repayment terms.

Credit risk grades are a primary input into the determination of the term structure of PD for exposures. The Bank collects performance and default information about its credit risk exposures analysed by type of product and borrower as well as by credit risk grading. The Bank employs statistical models to analyse the data collected and generate estimates of the remaining lifetime PD of exposures and how these are expected to change as a result of the passage of time.

The Bank assesses whether credit risk has increased significantly since initial recognition at each reporting date. Determining whether an increase in credit risk is significant depends on the characteristics of the financial instrument and the borrower.
The credit risk may also be deemed to have increased significantly since initial recognition based on qualitative factors linked to the Bank's credit risk management processes that may not otherwise be fully reflected in its quantitative analysis on a timely basis. This will be the case for exposures that meet certain heightened risk criteria, such as placement on a watch list. Such qualitative factors are based on its expert judgment and relevant historical experiences.

As a backstop, the Bank considers that a significant increase in credit risk occurs no later than when an asset is more than 30 days past due. Days past due are determined by counting the number of days since the earliest elapsed due date in respect of which full payment has not been received. Due dates are determined without considering any grace period that might be available to the borrower. If there is evidence that there is no longer a significant increase in credit risk relative to initial recognition, then the loss allowance on an instrument returns to being measured as 12-month ECL. Some qualitative indicators such as delinquency or forbearance, may be indicative of an increased risk of default that persists after the indicator itself has ceased to exist. In these cases, the Bank determines a probation period during which the financial asset is required to demonstrate good behaviour to provide evidence that its credit risk has declined sufficiently.

When contractual terms of a loan have been modified, evidence that the criteria for recognising lifetime ECL are no longer met includes a history of up-to-date payment performance against the modified contractual terms.

The Bank monitors the effectiveness of the criteria used to identify significant increases in credit risk by regular reviews to confirm that:

- the criteria are capable of identifying significant increases in credit risk before an exposure is in default;
- the criteria do not align with the point in time when an asset becomes 30 days past due;
- the average time between the identification of a significant increase in credit risk and default appears reasonable;
- exposures are not generally transferred directly from 12-month ECL measurement to credit- impaired; and
- there is no unwarranted volatility in loss allowance from transfers between 12-month PD (Stage 1) and lifetime PD (Stage 2)

Definition of default- The Bank considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Bank in full, without recourse by the Bank to actions such as realising security (if any is held);
- the borrower is more than 90 days past due on any material credit obligation to the Bank.
- overdrafts are considered as being past due once the customer has breached an advised limit or been advised of a limit smaller than the current amount outstanding; or

it is becoming probable that the borrower will restructure the asset as a result of bankruptcy due to the borrower's inability to pay its credit obligations.

In assessing whether a borrower is in default, the Bank considers indicators that are:

- qualitative: e.g. breaches of covenant;
- quantitative: e.g. overdue status and non-payment on another obligation of the same issuer to the Bank; and
- based on data developed internally and obtained from external sources.
- Inputs into the assessment of whether a financial instrument is in default and their significance may vary over time to reflect changes in circumstances.

The definition of default largely aligns with that applied by the Bank for regulatory capital purposes.

Wegagen Bank S.C
Annual Consolidated and Separate Financial Statements
For the Year Ended 30 June 2026

The Bank incorporates forward-looking information into both the assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and the measurement of ECL.

For each segment, the Bank formulates three economic scenarios: a base case, which is the median scenario, and two less likely scenarios, one upside and one downside. For each sector, the base case is aligned with the macroeconomic model's information value output, a measure of the predictive power of the model, as well as base macroeconomic projections for identified macroeconomic variables for each sector. The upside and downside scenarios are based on a combination of a percentage error factor of each sector model as well as simulated optimistic and pessimistic macroeconomic projections based on a measure of historical macroeconomic volatilities.

External information considered includes economic data and forecasts published by Business Monitor International, an external and independent macroeconomic data body. This is in addition to industry – level, semi – annual NPL trends across statistically comparable sectors.

Periodically, the Bank carries out stress testing of more extreme shocks to calibrate its determination of the upside and downside representative scenarios. A comprehensive review is performed at least annually on the design of the scenarios by a panel of experts that advises the Bank's senior management.

The Bank has identified and documented key drivers of credit risk and credit losses for each portfolio of financial instruments and, using an analysis of historical data, has estimated relationships between macro-economic variables and credit risk and credit losses.

LGD is the magnitude of the likely loss if there is a default. The Bank estimates LGD parameters based on the history of recovery rates of claims against defaulted counterparties. The LGD models consider the structure, collateral, seniority of the claim, counterparty industry and recovery costs of any collateral that is integral to the financial asset.

EAD represents the expected exposure in the event of a default. The Bank derives the EAD from the current exposure to the counterparty and potential changes to the current amount allowed under the contract and arising from amortisation. The EAD of a financial asset is its gross carrying amount at the time of default. For lending commitments, the EADs are potential future amounts that may be drawn under the contract, which are estimated based on historical observations and forward-looking forecasts. For financial guarantees, the EAD represents the amount of the guaranteed exposure when the financial guarantee becomes payable. For some financial assets, EAD is determined by modelling the range of possible exposure outcomes at various points in time using scenario and statistical techniques.

Where modelling of a parameter is carried out on a collective basis, the financial instruments are grouped on the basis of shared risk characteristics that include:

- instrument type;
- credit risk grading;
- collateral type;
- LTV ratio for retail mortgages;
- date of initial recognition;
- remaining term to maturity;
- industry; and
- geographic location of the borrower.
- The groupings are subject to regular review to ensure that exposures within a particular group remain appropriately homogeneous.

c. Credit-impaired financial assets

At each reporting date, the Bank shall assess whether financial assets carried at amortized cost, debt financial assets carried at FVOCI, and finance lease receivables are credit impaired (referred to as 'Stage 3 financial assets'). A financial asset shall be considered 'credit impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or past due event;
- the restructuring of a loan or advance by the Bank on terms that the Bank would not consider otherwise;
- it is becoming probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

A loan that has been renegotiated due to a deterioration in the borrower's condition shall be considered to be credit-impair unless there is evidence that the risk of not receiving contractual cash flows has reduced significantly and there are no other indicators of impairment. In addition, a retail loan that is overdue for 90 days or more shall be considered credit-impaired even when the regulatory definition of default is different.

d. Presentation of allowance for ECL in the statement of financial position

Loss allowances for ECL shall be presented in the statement of financial position as follows:

- for financial assets measured at amortized cost: as a deduction from the gross carrying amount of the assets;
- for loan commitments and financial guarantee contracts: generally, as a provision;
- where a financial instrument includes both a drawn and an undrawn component, and the Bank cannot identify the ECL on the loan commitment component separately from those on the drawn component: the Bank presents a combined loss allowance for both components. The combined amount is presented as a deduction from the gross carrying amount of the drawn component. Any excess of the loss allowance over the gross amount of the drawn component is presented as a provision; and
- for debt instruments measured at FVOCI: no loss allowance is recognized in the statement of financial position because the carrying amount of these assets is their fair value. However, the loss allowance shall be disclosed and is recognized in the fair value reserve.

Wegagen Bank S.C
Annual Consolidated and Separate Financial Statements
For the Year Ended 30 June 2026

e. Write-off

Loans and debt securities shall be written off (either partially or in full) when there is no reasonable expectation of recovering the amount in its entirety or a portion thereof. This is generally the case when the Bank determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. This assessment shall be carried out at the individual asset level.

Recoveries of amounts previously written off shall be included in 'impairment losses on financial instruments' in the statement of profit or loss and OCI.

Financial assets that are written off could still be subject to enforcement activities in order to comply with the Bank's procedures for recovery of amounts due.

f. Non-integral financial guarantee contracts

The Bank shall assess whether a financial guarantee contract held is an integral element of a financial asset that is accounted for as a component of that instrument or is a contract that is accounted for separately.

Where the Bank determines that the guarantee is an integral element of the financial asset, then any premium payable in connection with the initial recognition of the financial asset shall be treated as a transaction cost of acquiring it. The Bank shall consider the effect of the protection when measuring the fair value of the debt instrument and when measuring ECL.

Where the Bank determines that the guarantee is not an integral element of the debt instrument, then it shall recognize an asset representing any prepayment of guarantee premium and a right to compensation for credit losses.

g. Derecognition

The Bank shall derecognise a financial asset when:

- The contractual right to the cash flows from the financial asset expires or
- It transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred; or
- Bank neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset derecognized) and the sum of (i) the consideration received (including any new asset obtained less any new liability assumed) and (ii) any cumulative gain or loss that had been recognized in OCI shall be recognized in profit or loss.

Any cumulative gain/loss recognized in OCI in respect of equity investment securities designated as at FVOCI shall not be recognized in profit or loss on derecognition of such securities. Any interest in transferred financial assets that qualify for derecognition that is created or retained by the Bank shall be recognized as a separate asset or liability.

The Bank shall derecognise a financial liability when its contractual obligations are discharged or cancelled, or expire.

h. Modifications of financial assets and financial liabilities

If the terms of a financial asset are modified, then the Bank shall evaluate whether the cash flows of the modified asset are substantially different. If the cash flows are substantially different, then the contractual rights to cash flows from the original financial asset shall be deemed to have expired. In this case, the original financial asset shall be derecognised and a new financial asset shall be recognized at fair value plus any eligible transaction costs. Any fees received as part of the modification shall be accounted for as follows:

- fees that are considered in determining the fair value of the new asset and fees that represent reimbursement of eligible transaction costs shall be included in the initial measurement of the asset; and
- other fees are included in profit or loss as part of the gain or loss on derecognition.

If cash flows are modified when the borrower is in financial difficulties, then the objective of the modification is usually to maximise recovery of the original contractual terms rather than to originate a new asset with substantially different terms.

If the Bank plans to modify a financial asset in a way that would result in forgiveness of cash flows, then it shall first consider whether a portion of the asset should be written off before the modification takes place.

Where the modification of a financial asset measured at amortised cost or FVOCI does not result in derecognition of the financial asset, then the Bank shall first recalculate the gross carrying amount of the financial asset using the original effective interest rate of the asset and recognises the resulting adjustment as a modification gain or loss in profit or loss.

Any costs or fees incurred and fees received as part of the modification adjust the gross carrying amount of the modified financial asset and shall be amortised over the remaining term of the modified financial asset. Where such a modification is carried out because of financial difficulties of the borrower, then the gain or loss shall be presented together with impairment losses. In other cases, it shall be presented as interest income calculated using the effective interest rate method.

The Bank shall derecognise a financial liability when its terms are modified and the cash flows of the modified liability are substantially different. In this case, a new financial liability based on the modified terms shall be recognised at fair value. The difference between the carrying amount of the financial liability derecognised and consideration paid is recognised in profit or loss. Consideration paid shall include non-financial assets transferred, if any, and the assumption of liabilities, including the new modified financial liability.

Where the modification of a financial liability is not accounted for as derecognition, then the amortised cost of the liability shall be recalculated by discounting the modified cash flows at the original effective interest rate and the resulting gain or loss is recognised in profit or loss. Any costs and fees incurred are recognised as an adjustment to the carrying amount of the liability and amortised over the remaining term of the modified financial liability by re-computing the effective interest rate on the instrument.

Wegagen Bank S.C
Annual Consolidated and Separate Financial Statements
For the Year Ended 30 June 2026

i. Offsetting

Financial assets and financial liabilities shall be offset and the net amount presented in the statement of financial position when, and only when, the Bank currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

Income and expenses shall be presented on a net basis only when permitted under IFRS, or for gains and losses arising from a group of similar transactions such as in the Bank's trading activity.

j. Designation at fair value through profit or loss

At initial recognition, the Bank may designate certain financial assets as at FVTPL because this designation eliminates or significantly reduces an accounting mismatch, which would otherwise arise.

The Bank shall designate certain financial liabilities as at FVTPL in either of the following circumstances:

- the liabilities are managed, evaluated and reported internally on a fair value basis; or
- the designation eliminates or significantly reduces an accounting mismatch that would otherwise arise.

2.6 Interest Free Banking

Murabaha is an Islamic financing transaction which represents an agreement whereby the Bank buys a commodity/good and sells it to a counterparty (customer) based on a promise received from that counterparty to buy the commodity according to specific terms and conditions. The selling price comprises of the cost of the commodity/goods and a pre-agreed profit margin.

It is treated as financing receivables. Financing receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market.

The profit is quantifiable and contractually determined at the commencement of the contract. Murabaha Income (profit) is recognized as it accrues over the life of the contract using the effective profit method (EPRM) on the principal balance outstanding. These products are carried at amortized cost less impairment.

IFRS 9 requires amortised cost instruments to reflect time value via the Effective Interest Rate (EIR) method. To comply with Sharia prohibitions on interest (Riba), Interest-Free Banking uses the same calculation under the name Effective Profit Rate (EPR) or Effective Profit Method (EPM).

2.7 Cash and Cash Equivalents

Cash and cash equivalents' include notes and coins on hand, unrestricted balances held with central banks and highly liquid financial assets with original maturities of three months or less from the date of acquisition that are subject to an insignificant risk of changes in their fair value, and are used by the Bank in the management of its short-term commitments. Cash and cash equivalents are carried at amortized cost in the statement of financial position.

2.8 Property, Plant and Equipment

Property, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the property, plant and equipment if the recognition criteria are met. When significant parts of property, plant and equipment are required to be replaced at intervals, the Bank recognises such parts as individual assets with specific useful lives and depreciates them accordingly. All other repair and maintenance costs are recognised in profit or loss as incurred.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised.

Depreciation is calculated using the straight-line method to allocate their cost to their residual values starting from the asset is available for use over their estimated useful lives, as follows:

Asset class	Useful Lives (years)
Buildings	50
Computer hardware	7
Furnitures and fittings	10
Equipments	5 to 20
Lifts	15
Motor Vehicles	10

Capital work-in-progress is not depreciated as these assets are not yet available for use.

An item of property, plant and equipment and any significant part initially recognised, is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss when the asset is derecognised.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year-end and adjusted prospectively, if appropriate.

2.9 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses, if any. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in Profit or loss in the period in which the expenditure is incurred.

The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are amortised over the useful economic life. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year-end. Changes in the expected useful life, or the expected pattern of consumption of future economic benefits embodied in the asset, are accounted for by changing the amortisation period or methodology, as appropriate, which are then treated as changes in accounting estimates. The amortisation expenses on intangible assets with finite lives is presented as a separate item in the Profit or loss.

Amortisation is calculated using the straight–line method to write down the cost of intangible assets to their residual values over their estimated useful lives, which range from two to six years.

Wegagen Bank S.C
Annual Consolidated and Separate Financial Statements
For the Year Ended 30 June 2026

2.10 Impairment of non-financial asset

The Bank assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Bank estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Bank bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Bank's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year.

For assets an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Bank estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Profit or loss.

2.11 Other assets

Other assets are generally defined as claims held against other entities for the future receipt of money. The other assets in the Bank's financial statements include the following:

a. Prepayment

Prepayments are payments made in advance for services to be enjoyed in future. The amount is initially capitalized in the reporting period in which the payment is made and subsequently amortised over the period in which the service is to be enjoyed.

b. Other receivables

Other receivables are recognised upon the occurrence of event or transaction as they arise and cancelled when payment is received.

The Bank's other receivables are receivables from mastercard, receivables from visa card and other receivables from debtors. This has been added to the the carrying amounts of the investment.

2.12 Fair value measurement

The Bank measures financial instruments at fair value at each statement of financial position date. Fair value-related disclosures for financial instruments and non-financial assets that are measured at fair value or where fair values are disclosed are summarised in the following notes:

- Disclosures for valuation methods, significant estimates and assumptions
- Quantitative disclosures of fair value measurement hierarchy
- Financial instruments (including those carried at amortised cost)

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to by the Bank. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The Bank uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements regularly, the Bank determines whether transfers have occurred between Levels in the hierarchy by reassessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.
The Bank's management determines the policies and procedures for recurring fair value measurement.
For fair value disclosures, the Bank has determined classes of assets and liabilities based on the nature, characteristics, and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Wegagen Bank S.C
Annual Consolidated and Separate Financial Statements
For the Year Ended 30 June 2026

2.13 Employee benefits

The Bank operates various post-employment schemes, including both defined benefit and defined contribution pension plans and post employment benefits.

a. Defined contribution plan

The Bank operates defined contribution plan;

The Bank operates defined contribution plan;

- pension scheme in line with the provisions of Ethiopian pension of private organisation employees proclamation 715/2011 (as ammended no. 1268/2022).

Funding under the scheme is 7% and 11% by employees and the Bank respectively;

b. Defined benefit plan

The liability or asset recognised in the statement of financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method.

The liability recognised in the statement of financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension obligation.

The current service cost of the defined benefit plan, recognised in the Profit or loss in employee benefit expense, except where included in the cost of an asset, reflects the increase in the defined benefit obligation resulting from employee service in the current year, benefit changes curtailments and settlements.

Past-service costs are recognised immediately in Profit or loss

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise.

c. Profit-sharing and bonus plans

The Banks recognises a liability and an expense for bonuses and profit-sharing based on a formula that takes into consideration the profit attributable to the company's shareholders after certain adjustments. The Bank recognises a provision where contractually obliged or where there is a past practice that has created a constructive obligation.

2.14 Provisions

Provisions are recognised when the bank has a present obligation (legal or constructive) as a result of a past event, an outflow of resources embodying economic benefits will probably be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. When the Bank expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in profit or loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as other operating expenses.

2.15 Share capital

Incremental costs directly attributable to the issue of new shares or options or to the acquisition of a business are shown in equity as a deduction, net of tax, from the proceeds.

2.16 Earnings per share

The Bank presents basic earnings per share for its ordinary shares. Basic earnings per share are calculated by dividing the profit or loss attributable to ordinary shareholders of the Bank by the weighted average number of shares outstanding during the period.

2.17 Leases

The Bank has initially adopted IFRS 16 from 1 July 2019. The standard eliminates the classification of leases as either operating leases or finance leases under IAS 17 and introduces a single lease accounting model that requires lessees to recognize assets and corresponding liabilities. Due to the transition method chosen by the Bank in applying IFRS 16, comparative information throughout these financial statements has not generally been restated to reflect its requirements.

It also elected to apply the practical expedient that allows entities to rely on its assessment of whether leases were onerous by applying IAS 37 Provisions, Contingent Liabilities and Contingent Assets immediately before the date of initial application as an alternative to performing an impairment review.

The effect of initially applying IFRS 16 is mainly attributed to:

- an increase in non-current assets as obligations to make future payments under leases previously classified as an operating lease were recognized on the balance sheet, along with the corresponding asset: right-of-use asset.
- Expenditure on operation has decreased and finance cost have increased, as operating lease costs have been replaced by depreciation and interest expense on lease liabilities.

The adoption of IFRS 16 requires the Bank to make a number of assumptions, estimations and judgments that includes:

- lease liabilities were determined based on the value of the remaining lease payments, discounted by an appropriate incremental borrowing rate.
- term of each arrengment was based on the orlginal lease term.
- the discount rate used to determine lease liabilities was the Bank's incremental borrowing rate. It was calculated based on observable inputs.

Wegagen Bank S.C
Annual Consolidated and Separate Financial Statements
For the Year Ended 30 June 2026

At the commencement date, the Bank recognized:

- all leases as right right-of-use-asset at cost. Cost of right-of-use asset includes the amount of lease liability, lease payments made at or before the commencement date (less any lease incentives received), any initial direct costs incurred and an estimate of costs to be incurred by the Bank in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories.
- a lease liability at the present value of the lease payments that are not paid at that date. Present value of lease payments will be determined by discounting future lease payments at the interest rate implicit in the lease arrangement, if it is readily determined or at Bank's incremental borrowing rate.

After the commencement date, the Bank masures:

- right-of-use assets using cost model, i.e. cost at initial recognition less accumulated depreciation (in line with IAS 16: Property, plant and Equipment) and accumulated impairment losses (in line with IAS 36: Impairment of Assets).
- lease liability by increasing its carrying amount to reflect interest on the lease liability and by reducing its carrying amount to reflect lease payments made.

Interest incurred on lease liability will be recognized in the statement of profit and loss as a finance cost.

Determination of whether an arrangement is a lease, or contains a lease

The determination of whether an arrangement is a lease, or contains a lease, is based on the substance of the arrangement and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset or assets or whether the arrangement conveys a right to use the asset.

Bank as a Lessor

The Bank has rented temporary freehold space in its head office building that is mainly constructed for office use. The lease advance payments are recognized as deferred income until recognized.

2.18 Income taxation

a. Current income tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in Ethiopia. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

b. Deferred tax

Deferred tax is recognised on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill; deferred tax is not accounted for if it arises from initial recognition

of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss.

Deferred tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the statement of financial position date and are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.

Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

Deferred tax assets and liabilities are only offset when there is both the legal right and the intention to settle on a net basis or to realise the asset and settle the liability simultaneously.

2.19 Consolidated financial statements

2.19.1 Subsidiery

The bank controls and hence consolidate an entity when it is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Power exists where the bank has existing rights that give it the current ability to direct the relevant activities of the investee (i.e. the activities that most significantly affect the entity's returns).

These requirements apply to all entities, including voting right entities (also commonly known as operating entities) and structured entities. Only substantive rights, and not protective rights, are considered when assessing power. For rights to be substantive, the party must have the practical ability to exercise those rights, and such rights must not be protective in nature. Protective rights are designed at inception to protect the interests of the holder against future risks without giving that party participative power over the entity, and hence that party cannot at inception have power or prevent another party from having power over the entity.

Factors that have been considered by the bank in reaching decision of consolidate investee are as follows:

- Wegagen bank aquired 86.82% or near to 87% of Wegagen-capital invetsment bank shares. This gives Wegagen bank majority ownership (i.e >50%);
- majority of board membership and key decisions are under control;
- having majority votes; and
- Due to majority owneship, It takes big chunk of profit or loss

The bank reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the elements of control included above.Intragroup transactions and balances are eliminated on consolidation and consistent accounting policies are used throughout the bank for the purposes of the consolidation.Changes in ownership interests in subsidiaries are accounted for as equity transactions if they occur after control has already been obtained and they do not result in loss of control.

Investments in subsidiaries are accounted for at cost less impairment in the separate financial statements of the investor. The cost of these investments is assessed for impairment when there are indicators that an impairment may have occurred. Where an indicator of impairment exists, the recoverable amount of the investment is calculated and an impairment loss is recognised to the extent that the recoverable amount of the investment is less than its cost.

Wegagen Bank S.C
Annual Consolidated and Separate Financial Statements
For the Year Ended 30 June 2026

3. Significant accounting judgements, estimates and assumptions

The preparation of the Bank's financial statements requires management to make judgements, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities, and the accompanying disclosures, as well as the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Other disclosures relating to the Bank's exposure to risks and uncertainties includes:

- Capital management
- Financial risk management and policies
- Sensitivity analyses disclosures

3.1 Judgements

In the process of applying the Bank's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the financial statements:

Operating lease commitments - Bank as lessee The Bank has entered into commercial property leases. The Bank has determined, based on an evaluation of the terms and conditions of the arrangements, such as the lease term not constituting a substantial portion of the economic life of the commercial property, that it does not retain all the significant risks and rewards of ownership of these properties and accounts for the contracts as operating leases.

3.2 Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Bank based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances beyond the control of the Bank. Such changes are reflected in the assumptions when they occur.

Impairment losses on financial assets at amortized cost

The Bank reviews its loan portfolios for impairment on an on-going basis. The Bank first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant.

Impairment provisions are also recognised for losses not specifically identified but which, experience and observable data indicate, are present in the portfolio at the date of assessment. For individually significant financial assets that has been deemed to be impaired, management has deemed that cashflow from collateral obtained would arise within 12 months where the financial asset is collaterised.

Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio, when scheduling its future cash flows. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

The use of historical loss experience is supplemented with significant management judgment to assess whether current economic and credit conditions are such that the actual level of inherent losses is likely to differ from that suggested by historical experience. In normal circumstances, historical experience provides objective and relevant information from which to assess inherent loss within each portfolio. In other circumstances, historical loss experience provides less relevant information about the inherent loss in a given portfolio at the statement of financial position date, for example, where there have been changes in economic conditions such that the most recent trends in risk factors are not fully reflected in the historical information. In these circumstances, such risk factors are taken into account when calculating the appropriate levels of impairment allowances, by adjusting the impairment loss derived solely from historical loss experience.

The detailed methodologies, areas of estimation and judgement applied in the calculation of the Bank's impairment charge on financial assets are set out in the Financial risk management section.
The estimation of impairment losses is subject to uncertainty, which has increased in the current economic environment, and is highly sensitive to factors such as the level of economic activity, unemployment rates, property price trends, and interest rates. The assumptions underlying this judgement are highly subjective. The methodology and the assumptions used in calculating impairment losses are reviewed regularly in the light of differences between loss estimates and actual loss experience.

Fair value measurement of financial instrument

When the fair values of financial assets recorded in the statement of financial position cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the discounted cash flow (DCF) model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. As at the year end there are no financial instrument currently measured at fair value.

Defined benefit plans

The cost of the defined benefit pension plan, such as managerial employee compensation and severance benefits, and the present value of these benefit obligations are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, mortality rates and future pension increases. Due to the complexities of valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

Wegagen Bank S.C
Annual Consolidated and Separate Financial Statements
For the Year Ended 30 June 2026

Depreciation and carrying value of property, plant and equipment

The estimation of the useful lives and residual values of assets is based on management's judgement. Any material adjustment to the estimated useful lives of items of property and equipment will have an impact on the carrying value of these items.

Taxes

Uncertainties exist with respect to the interpretation of complex tax regulations, changes in tax laws, and the amount and timing of future taxable income. Given the wide range of international business relationships and the long-term nature and complexity of existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded. The amount of such provisions is based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority.

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

Development cost

The Bank capitalises development costs for a project in accordance with the accounting policy. Initial capitalisation of costs is based on management's judgement that technological and economic feasibility is confirmed, usually when a product development project has reached a defined milestone according to an established project management model. In determining the amounts to be capitalised, management makes assumptions regarding the expected future cash generation of the project, discount rates to be applied and the expected period of benefits. The development costs that were capitalised by the Bank relates to those arising from the development of computer software.

በወጋገን ቪዛ ካርድ

Wegagen Bank and the FDRE Ministry of Labor and Skills Signed a Memorandum of Understanding (MoU) to Jointly Work on Expanding Job Creation, Skill Development, and Boosting Financial Accessibility

4. Financial Risk Management

4.1 Introduction

Risk is inherent in the Bank's activities, but is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. This process of risk management is critical to the Bank's continuing existence and profitability and each individual within the Bank is accountable for the risk exposures relating to his or her responsibilities. The Bank is exposed to credit risk, liquidity risk and market risk. It is also subject to country risk and various operating risk.

4.1.1 Risk Management Structure

The Board of Directors ("the Board") has overall responsibility for the establishment and oversight of the Bank's risk management framework. The Board has established Risk and Compliance sub-Committee, which is responsible for developing and monitoring Bank's risk management policies.

The Bank's risk management policies are established to identify and analyze the risks faced by the Bank, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in the regulation, market conditions, products and services offered. The Bank, through its training and procedures and policies for management, aims to develop a constructive control environment, in which all employees understand their roles and obligations.

The Bank's Board of Directors is assisted in these functions by the Risk and Compliance Management unit which undertakes both regular and ad-hoc reviews of risk management controls and procedures, the results of which are reported to the Risk Management Committee.

4.1.2 Risk Measurement and Reporting Systems

The Bank's risks are measured using a method that reflects both the expected loss likely to arise in normal circumstances and unexpected losses, which are an estimate of the ultimate actual loss based on statistical models. The models make use of probabilities derived from historical experience, adjusted to reflect the economic environment. The Bank also runs worst-case scenarios that would arise in the event that extreme events which are unlikely to occur do, in fact, occur.

Monitoring and controlling risks is primarily performed based on limits established by the Bank. These limits reflect the business strategy and market environment of the Bank as well as the level of risk that the Bank is willing to accept, with additional emphasis on selected regions. In addition, the Bank's policy is to measure and monitor the overall risk bearing capacity in relation to the aggregate risk exposure across all risk types and activities.

4.1.3 Risk Mitigation

Risk controls and mitigants, identified and approved for the Bank, are documented for existing and new processes and systems. The adequacy of these mitigants is tested on a periodic basis through administration of control self-assessment questionnaires, using an operational risk management tool which requires risk owners to confirm the effectiveness of established controls. These are subsequently audited as part of the review process.

4.2 Classification of financial assets and financial liabilities

The following table shows measurement categories and amounts in accordance IFRS 9 for the Bank's financial assets and financial liabilities as at June 30,2026

Financial assets	Financial assets (Birr '000)			
	30-Jun-26			30-Jun-25
	Classification under IFRS 9	New carrying amount under IFRS 9	Increase/ decrease	Original carrying amount
Cash and bank balances	Amortised cost	22,569,852	7,539,570	15,030,282
Placements with Financial Institutions	Amortised cost	1,410,424	1,004,506	405,918
Loans and advances to customers (net)	Amortised cost	64,590,783	13,330,281	51,260,502
Equity Investments at FVOCI	FVOCI	1,126,412	303,518	822,894
Investment securities: Loans and receivables	Amortised cost	8,674,852	363,659	8,311,193
Other financial assets at amortised cost	Amortised cost	4,496,614	1,168,141	3,328,473
Total financial assets		**102,868,938**	**23,709,676**	**79,159,262**
Financial liabilities				
Deposits from customers	Amortised cost	73,517,597	11,865,778	61,651,819
Deposit from financial institutions	Amortised cost	7,735,887	3,237,669	4,498,218
Other financial liabilities	Amortised cost	10,830,605	7,142,381	3,688,224
Total financial liabilities		**92,084,089**	**22,245,827**	**69,838,261**

The application of the Bank's accounting policies on the classification of financial instruments under IFRS 9 are set out in Note 2.5 resulted in the reclassifications set out in the table above and explained below.

Further equity investment securities were reclassified out available-for-sale categories to FVOCI at their then fair values. The carrying amount of those assets was adjusted so that their amortised cost under IFRS 9 was as if those assets were accounted for at amortised cost from their inception.

On the adoption of IFRS 9, some other financial assets were reclassified out of the loans and receivable to amortized cost and some to non financial assets. The carrying amount of those assets was adjusted so that their amortised cost under IFRS 9 was as if those assets were accounted for at amortised cost from their inception.

4.3 Credit Risk

Credit Risk is risk of financial loss to the bank if a customer or counter party to a financial instrument fails to meet its contractual obligations, and arises principally from the banks loans & advances to customers & other banks & investment securities & other financial assets the bank adopts conservative approach to credit risk.

4.3.1 Management of credit risk

For risk management reporting purposes, the Bank considers and consolidates all elements of credit risk exposure (such as individual obligor default risk and sector risk).

Exposure to credit risk is managed through periodic analysis of the ability of borrowers and potential borrowers to determine their capacity to meet principal and interest thereon. Exposure to credit risk is also mitigated, in part, by obtaining collateral, commercial and personal guarantees. In Managing credit risk the Board of Directors approves the credit policy, risk limits, collateral requirements, risk gradings and follows up the implementation of same. The credit limits are placed on the amount of risk accepted in relation to one borrower, or groups of borrowers, to geographical regions, and to term of the financial instrument and economic sectors. The policies and limits are reviewed and modified periodically based on changes and expectations of the markets where the Bank operates, regulations, and other factors.

4.3.2 Concentrations of credit risk

Gross loans and advances to customers per sector is analysed as follows:

	30 June 2026 Birr'000	30 June 2025 Birr'000
Loans and advances;		
Manufacturing	9,003,245	7,855,541
Domestic Trade and Services	10,077,936	9,580,063
Construction	12,761,095	8,241,443
Transport Service	5,528,862	4,228,026
Export	12,240,822	8,791,973
Import	14,969,721	13,242,348
Staff loans	486,681	311,679
Digital lending	1,215,718	624,095
IFB-Financing & Investments	1,030,936	650,146
	67,315,017	**53,525,315**
Off-statement of financial position exposure;		
Guarantees	9,246,187	4,583,597
Letter of Credit	24,380,565	3,322,967
Undrawn loan and advances	8,878,483	6,100,397
	42,505,235	**14,006,961**

4.3.3 Credit quality analysis

The following table sets out information about the credit quality of financial assets measured at amortised cost, debt investments and available-for-sale debt assets. Unless specifically indicated, for financial assets, the amounts in the table represent gross carrying amounts The loss allowance for loans and advances to customers also includes the loss allowances for loan commitments, letter of credit and financial guarantee contracts.

a. Credit Quality Analysis for Loans and Advances

	June 30,2026			Birr'000
Loans & advances to customers	**Stage 1**	**Stage 2**	**Stage 3**	**Total**
Stage 1 – Pass	61,061,684			61,061,684
Stage 2 – Special mention		2,582,018		2,582,018
Stage 3 - Non performing			3,671,316	3,671,316
Total gross exposure	**61,061,684**	**2,582,018**	**3,671,316**	**67,315,017**
Loss allowance	876,949	49,260	1,798,025	2,724,234
Net carrying amount	**60,184,735**	**2,532,758**	**1,873,291**	**64,590,783**

	June 30,2025			Birr'000
Loans & advances to customers	**Stage 1**	**Stage 2**	**Stage 3**	**Total**
Stage 1 – Pass	47,903,236			47,903,236
Stage 2 – Special mention		2,423,494		2,423,494
Stage 3 - Non performing			3,198,586	3,198,586
Total gross exposure	**47,903,236**	**2,423,494**	**3,198,586**	**53,525,315**
Loss allowance	662,783	35,842	1,566,188	2,264,813
Net carrying amount	**47,240,452**	**2,387,653**	**1,632,398**	**51,260,502**

b. Credit Quality Analysis for Others Assets

		June 30,2026		Birr'000
Item	**Stage**	**Gross Exposure**	**Loss allowance**	**Net carrying amount**
Cash and balances with banks	12 Month ECL	23,980,735	(459)	23,980,276
Investment securities (debt instruments)	12 Month ECL	8,675,334	(482)	8,674,852
Other financial assets	Lifetime ECL	4,496,614	(621,720)	3,874,894
Totals		**37,152,683**	**(622,660)**	**36,530,022**

		June 30,2025		Birr'000
	Stage	**Gross Exposure**	**Loss allowance**	**Net carrying amount**
Cash and bank balances	12 Month ECL	15,436,265	(65)	15,436,200
Investment securities (debt instruments)	12 Month ECL	8,311,604	(411)	8,311,193
Other financial assets	Lifetime ECL	3,328,473	(802,424)	2,526,049
Totals		**27,076,342**	**(802,900)**	**26,273,442**

4.3.4 Collateral held and their financial effect

The general creditworthiness of a customer tends to be the most relevant indicator of credit quality of a loan extended to it. However, collateral provides additional security and the Bank generally requests collateral for loans and advances granted to customers.

The Bank may take collateral in the form of a first charge over real estate, liens and guarantees. The Bank does not sell or repledge the collateral in the absence of default by the owner of the collateral. In addition to the Bank's focus on creditworthiness, the Bank aligns with its credit policy guide to periodically update the validation of collaterals held against all loans to customers.

For impaired loans, the Bank obtains appraisals of collateral because the fair value of the collateral is an input to the impairment measurement. The fair value of the collaterals are based on the last revaluations carried out by the Bank's in-house engineers, which is usually done every three years.

The valuation technique adopted for properties is in line with the Bank's valuation manual and the revalued amount is similar to fair values of properties with similar size and location. The fair value of collaterals other than properties such as share certificates, cash, NBE bills etc. are disclosed at the carrying amount as management is of the opinion that the cost of the process of establishing the fair value of the collateral exceeds benefits accruable from the exercise.

Collateral Held ('000)

Type of financial asset	30-Jun-26	30-Jun-25	Principal type of collateral held
Loans and Advances	116,812,674	99,558,522	Land and building, vehicles,machines, shares and bank guarantees

4.3.5 Measurement of Expected Credit Losses (ECL)

I. Techniques used for estimating impairment

ECL is a probability-weighted estimate of credit losses. It shall be measured as follows:

- for financial assets that are not credit-impaired at the reporting date (stage 1 and 2): as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the Bank in accordance with the contract and the cash flows that the Bank expects to receive);
- for financial assets that are credit-impaired at the reporting date (stage 3): as the difference between the gross carrying amount and the present value of estimated future cash flows;
- for undrawn loan commitments: as the present value of the difference between the contractual cash flows that are due to the Bank if the commitment is drawn down and the cash flows that the Bank expects to receive; and
- for financial guarantee contracts: as the expected payments to reimburse the holder less any amounts that the Bank expects to recover.

Wegagen Bank S.C
Annual Consolidated and Separate Financial Statements
For the Year Ended 30 June 2026

II. Incorporation of forward-looking information

The FLI model incorporates forward-looking macroeconomic conditions through portfolio-specific adjustments developed for four clusters of statistically comparable economic sectors. These adjustments provide a common industry reference for member banks, subject to each bank's approved IFRS 9 governance, validation and management judgement.

For each cluster, three macroeconomic scenarios are modelled: base, upside and downside. The scenarios are developed from Fitch Ratings forecasts and scenario-specific assumptions. Probability weights are derived from the historical distribution of cluster-level NPL ratios over ten semi-annual observations from December 2021 to June 2026.

Historical credit risk performance is represented by cluster-level NPL ratios calculated as aggregate Stage 3 outstanding balances divided by aggregate total gross loan balances. Macroeconomic inputs comprise historical Ethiopian data and forward-looking projections from Fitch Ratings, an independent external provider.

The macroeconomic variables are screened using an absolute correlation threshold of 50% which is statistical best practice, followed by assessments of economic plausibility and multicollinearity. Variables meeting both the quantitative and qualitative criteria are retained for the modelling process.

Principal Component Analysis is applied to the selected variables to derive a composite macroeconomic index for each cluster and mitigate multicollinearity. The relationship between the composite index and historical cluster-level NPL ratios is then modelled to quantify credit risk sensitivity and derive probability-weighted macroeconomic adjustment factors.

Macroeconomic variable selection

The macroeconomic variables selected for the estimation of forward-looking adjustments for each portfolio cluster are presented below

Sector/Product	Macroeconomic factors
"Cluster 1 Agriculture, Consumer Loans,and Interest Free Financing "	• Import cover months • Current account bal, USD • G&S bal, USD • Nominal Effective Exchange Rate Index • CPI inflation, 2010=100, eop • Trade, goods bal, USD • Goods imp, USD
"Cluster 2 Domestic Trade & Services,Mining and Energy,Transport,Health,Merchadise,Financial services"	• CPI inflation, 2010=100, eop • Import cover months • Services exp, LCU • Current account bal, USD • Capex, LCU • Total revenue, LCU
"Cluster 3 Building & Construction,Hotel & Tourism,Manufacturing & Production Industry,Real estate,Housing & construction"	• Import cover months • G&S imp, LCU • Private final cons, LCU • Budget bal, USD • Services imp, USD • Trade, goods bal, USD
"Cluster 4 Export,Import,Advance against import bills,International Trade"	• Nominal Effective Exchange Rate Index • Use of IMF credit/cap, USD • Total revenue, USD • Capex, USD • Total expend, USD • LCU/USD, eop • Total govt debt, LCU

The economic scenarios used included the following key indicators for Ethiopia for the years 2024 to 2026:

Indicators	30-Jun-24	30-Jun-25	30-Jun-26
CPI inflation, 2010=100, eop	944	1,067	1,195
CPI inflation, 2010=100, avg	964	1,127	1,276

Non-performing loan rates computation

For purposes of the FLI analysis, Stage 3 outstanding balances and total gross loan balances were collected from the 27 member banks across the relevant economic sectors over the period 2021 to 2026, representing ten semi-annual data points. The sector data was aggregated to derive cluster-level NPL ratios for each reporting period. Sector-level NPL ratios were calculated as aggregate Stage 3 balances divided by total gross loans per cluster and subsequently mapped to the defined portfolio clusters. A summary of the resulting cluster-level NPL ratios is presented below

Date	Cluster 1	Cluster 2	Cluster 3	Cluster 4
December 2021.	19.06%	9.11%	9.32%	5.78%
June 2022.	12.26%	6.10%	7.22%	3.39%
December 2022.	7.93%	6.14%	8.50%	3.78%
June 2023.	7.25%	5.79%	3.97%	2.55%
December 2023.	8.21%	6.81%	4.37%	4.29%
June 2024.	8.88%	5.70%	2.91%	4.35%
December 2024.	9.17%	6.43%	4.92%	5.46%
June 2025.	8.18%	4.77%	4.36%	4.16%
December 2025.	7.68%	4.22%	6.31%	4.16%
June 2026.	7.30%	4.81%	5.44%	4.23%

Scenario weights

Scenario weights were derived using the historical distribution of cluster-level NPL ratios over the observation period from 2021 to 2026, comprising ten semi-annual data points. For each cluster, the historical mean and standard deviation of the NPL ratio were calculated. A confidence interval was then established using the mean NPL ratio plus or minus one standard deviation. Historical NPL observations falling within this range were

Wegagen Bank S.C
Annual Consolidated and Separate Financial Statements
For the Year Ended 30 June 2026

classified as base scenario outcomes. Observations exceeding the upper bound of the interval were classified as downside scenario outcomes, reflecting periods of elevated credit risk and deteriorating portfolio performance. Conversely, observations falling below the lower bound were classified as upside scenario outcomes, reflecting periods of improved credit quality and lower-than-expected default experience. The frequency of observations within each category was subsequently used to estimate the probability of occurrence of the respective scenarios. These probabilities were then applied as the scenario weights for the base, upside, and downside scenarios in the computation of probability-weighted forward-looking adjustments.

The resulting scenario weights are presented below

Summary of scenario weightings

	Base	Downside	Upside
Cluster 1	90.00%	10.00%	0.00%
Cluster 2	80.00%	10.00%	10.00%
Cluster 3	70.00%	20.00%	10.00%
Cluster 4	70.00%	20.00%	10.00%

The following tables show reconciliations from the opening to the closing balance of the loss allowance by class of financial instrument. Comparative amounts for 2026 represent the allowance account for credit losses and reflect the measurement basis under IFRS 9.

4.3.6 Offsetting financial assets and financial liabilities

The Bank does not offset financial assets against financial liabilities.

4.4 Liquidity risk

4.4.1 Introduction

Liquidity risk is the risk that the Bank cannot meet its maturing obligations when they become due, at reasonable cost and in a timely manner. Liquidity risk arises because of the possibility that the Bank might be unable to meet its payment obligations when they fall due as a result of mismatches in the timing of the cash flows under both normal and stress circumstances. Such scenarios could occur when funding needed for liquid asset positions is not available to the Bank on acceptable terms.

Liquidity risk management in the Bank is to ensure as far as possible that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions without incurring unacceptable losses or risking damage to the Bank's reputation.

4.4.2 Management of liquidity risk

Cash flow forecasting is performed by the Treasury Managment Directorate. The directorate monitors rolling forecasts of liquidity requirements to ensure it has sufficient cash to meet operational needs. The Bank evaluates its ability to meet its obligations on an ongoing basis. Based on these evaluations, the Bank devises strategies to manage its liquidity risk. Prudent liquidity risk management implies that sufficient cash is maintained and that sufficient funding is available to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to the Bank's reputation.

4.4.3 Maturity analysis of financial Assets and Financial liabilities

The Treasury directorate receives information from other directorates of Wegagen bank regarding the liquidity profile of their financial assets and liabilities and details of other projected cash flows arising from projected future business. It then maintain a portfolio of short-term liquid assets, largely made up of physical cash, cash with banks, short-term liquid investment securities, loans and advances to banks and other inter-bank facilities, to ensure that sufficient liquidity is maintained within the Bank. The liquidity position and market conditions are regularly monitored. All liquidity policies and procedures are subject to review and approval by ALCO. Daily reports cover the liquidity position of the Bank and liquidity reports are submitted weekly to the NBE. In addition to regulatory liquidty ratio requirements, the Bank has set its own internal liquidity ratio limits and monitor it accordingly.

The Bank has access to a limited funding base as there is no active primary and secondary market in Ethiopia. Funds are raised using instruments including deposits, borrowed funds and share capital. This enhances funding flexibility, limits dependence on any one source of funds and generally lowers the cost of funds. The Bank strives to maintain a balance between continuity of funding and flexibility through the use of liabilities with a range of maturities. The Bank continually assesses liquidity risk by identifying and monitoring changes in funding required meeting business goals and targets set in terms of the overall Bank strategy.

In order for the liquidity risk to be kept at acceptable level the bank has set internal limits on liquidity risk exposure which are regularly followed and reported. Also as part of the overall liquidity risk management in order to address future emergencies as a liquidity crisis management tool the bank has established liquidity

contingency plan with clearly defined roles and responsibilities of the parties involved in the processes itself. 'The liquidity contingency plan is specifying developments, so that immediate actions will be taken in order to prevent escalation of such events. In regular course of the activities of the Bank liquidity risk is managed according to the Policy and Procedure on liquidity risk management. As key indicators, that will be used to recognise liquidity problems, the Bank, as minimum is defining the following:

- substantial increase in the assets financed by short term deposits;
- significant and sudden decrease in the core deposits or loss of the regular depositors of the Bank;
- considerable decrease in the assets quality, particularly the credit portfolio;
- extensive withdrawal of deposits before their maturity date;
- regulatory liquidity indicators; internal liquidity indicators;

  As a part of the crisis management actions, within the Liquidity Contingency Plan, the following are considered as immediate:
- borrow on inter-bank money market;
- sell short term securities (domestic and foreign);
- borrowing from the National Bank of Ethiopia

4.4.4 Maturity analysis of financial Assets and Financial liabilities

The table below analyses the Bank's financial assets and liabilities into relevant maturity groupings based on the remaining period at the statement of financial position date to the contractual maturity date. The cash flows presented are the undiscounted amounts to be settled in future. Considering that 37% of the deposits will be withdrawan within a short period of time; one year without any additioanl deposit mobilization, which is unlikely to happen, there will be a positive liquidty gap between maturing assets and liabilities. Moreover, in terms of regulatory compliance in terms of liquidty postion, the Bank's liquidity postion as at June 30,2026 stood at 27.99%, which is well above the regulatory requirement of 15% indicating that the Bank is liquid to honor its committments. This was a persistent penomena during the whole year.

4.4.5 Financial assets pledged as collaterals

The Bank had no financial asset pledged as collateral during the year under review.

4.5 Market risk

Market risk is defined as the risk of loss risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market risk factors such as interest rates, foreign exchange rates, equity prices, credit spreads and their volatilities. Market risk can arise in conjunction with trading and non-trading activities of a financial institutions.

The Bank does not ordinarily engage in trading activities as there are no active markets in Ethiopia.

4.5.1 Management of market risk

The Bank manages changes in interest rate risk by applying fixed term interest rates while the foreign exchange risk is managed by matching of liabilities and assets and holding of assets appreciating currencies especially the USD to which the Birr is pegged to. Assets and liabilities committee (ALCO) analyzes the Bank's market risk on a monthly basis and reports to the Risk Committee. ALCO performs analyses and makes decisions with regard to balance sheet structure, liquidity risk, and currency risk and also is analyzing the risk of the Bank's treasury unit.

iii. Interest rate risk

'Interest rate risk is the risk that the value of a financial instrument will be affected by changes in market interest rates. Borrowings obtained at variable rates give rise to interest rate risk.

The Bank's exposure to the risk of changes in market interest rates relates primarily to the Bank's obligations and financial assets with floating interest rates. The Bank is also exposed on fixed rate financial assets and financial liabilities. The Bank's investment portfolio is comprised of loans and advances to customers, Ethiopian government bonds and cash deposits.

The table below sets out information on the exposures to interest rate sensitive financial assets and liabilities:

30 June 2026	Interest bearing Birr'000	Non-interest bearing Birr'000	Total Birr'000

For the Year Ended 30 June 2026

iv. Foreign exchange risk

Foreign exchange risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to the changes in foreign exchange rates.

The Bank is exposed to exchange rate risks to the extent of balances and transactions denominated in a currency other than the Ethiopian Birr. The Bank's foreign currency bank accounts act as a natural hedge for these transactions. Management has set up a policy to manage the Bank's foreign exchange risk against its functional currency. The table below summarises the impact of increases/decreases of 10% on equity and profit or loss arising from the Bank's foreign denominated borrowings and cash and bank balances.

Foreign currency denominated balance

Cash and bank balances;	30 June 2026 Birr'000	30 June 2025 Birr'000
USD	11,051,462	6,417,734
GBP	84,049	3,004
Euro	278,980	205,533
Other currencies	39,730	8,828
	11,454,221	**6,635,100**

Sensitivity analysis for foreign exchange risk

The sensitivity analysis for currency rate risk shows how changes in the fair value or future cash flows of a financial instrument will fluctuate because of changes in market rates at the reporting date. The sensitivity of the Bank's earnings to fluctuations in exchange rates is reflected by varying the exchange rates at 10% as shown below:

30 June 26	Basis points	Effect of appreciation of the Birr against foreign currencies Birr'000	Effect of depreciation of the Birr against foreign currencies Birr'000
USD	10%	1,105,146	(1,105,146)
GBP	10%	8,405	(8,405)
Euro	10%	27,898	(27,898)
Total		**1,141,449**	**(1,141,449)**

30 June 2025	Basis points	Effect of appreciation of the Birr against foreign currencies Birr'000	Effect of depreciation of the Birr against foreign currencies Birr'000
USD	10%	641,773.41	(641,773)
GBP	10%	300	(300)
Euro	10%	20,553	(20,553)
Total		**662,627**	**(662,627)**

4.6 Operational Risk

Operational risk is risk of loss due to inappropriate or weak internal processes, inappropriate persons and inappropriate or weak systems in the Bank as well as external events. The Bank defined its framework for managing operational risk by adopting the policy and procedure on operational risk management as approved by the board of directors of the Bank. In the Policy, the basic aims are defined such as operational risk management (system and processes for managing operational risk, organizational structure, reporting system, internal control and etc), as well as measuring and monitoring the operational risk. Implementation of the operational risk management framework is meant to be delivered by performing risk and control self-assessment on continuous process. During the fiscal year, the Bank made assessmnet of potentail operational risk areas including IT security risks, made register of operational risk incldents, investigated them and took action on perperators and strengthen its internal controls accordingly. Despite the number of operational risk incidents, the Bank sustained insignifact losses.

4.7 Capital management

The Bank's objectives when managing capital are to comply with the capital requirements set by the National Bank of Ethiopia, safeguard its ability to continue as a going concern, and to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business.

4.7.1 Risk based capital adequency

During the reporting period, the National Bank of Ethiopia issued a new risk-based capital adequacy directive in line with Basel II/III. It is the replacement for the long-serving directive SBB/9/95, since August 18, 1995.

According to the Licensing & Supervision of Banking Business Directive No. SBB/95/2025 of the National Bank of Ethiopia, a bank shall, at all times, maintain the following minimum capital adequacy ratio for each component of tier of capital and the total regulatory capital:

- Common Equity Tier 1 (CET1) ratio: seven percent (7 %) of risk-weighted assets;
- Tier 1 capital ratio: nine percent (9%) of risk-weighted assets; and
- Total capital (Tier 1 Capital plus Tier 2 Capital) ratio: eleven percent (11%) of risk-weighted assets.

The capital adequacy ratio is the quotient of the capital base of the Bank and the Bank's risk-weighted asset base. As at June 30, 2026, the total capital to risk-weighted asset ratio stood at 14.39%, showing a marginal decrease of 0.57% compared with the same period last year. This arises because of a new incorporation in the calculation of risk-weighted assets, i.e., operational and market risk.

Capita adequency ratio	**30-Jun-26**	**30-Jun-25**

CET1 to risk weighted asset	**13.26%**	**-**
Total Tier 1 capital to risk weighted asset	**13.26%**	**-**

CET1 capital of birr 13.4 bilion includes paid-up shares, share premium and legal reserves less deductibles of intangible assets. We have no additional tier I capital. Trier II capital of birr 1.03 Billion includes loan loss provisions up to 1.25 percentage point of credit risk weighted assets. Total risk weighted assets of birr 91.4Billion includes on balance sheet of Birr 75.6 Billion and off-balance sheet credit risk weighted assets of birr 7billion whereas operational risk weighted assets of Birr 6.6 Billion and market risk weighted assets of 2.06 Billion as of June 30, 2026.

4.8 Fair value of financial assets and liabilities

IFRS 13 requires an entity to classify measured or disclosed fair values according to a hierarchy that reflects the significance of observable inputs. All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, which comprises of three levels as described below, based on the lowest level input that is significant to the fair value measurement as a whole.

4.8.1 Valuation models

IFRS 13 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable input reflect market data obtained from independent sources; unobservable inputs reflect the Bank's market assumptions. All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole.

- Level 1: Inputs that are quoted market prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active, or other valuation technique in which all significant inputs are directly or indirectly observable from market data.
- In conclusion, this category is for valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.

- Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs). This category includes all assets and liabilities for which the valuation technique includes inputs not based on observable date and the unobservable inputs have a significant effect on the asset or liability's valuation. This category includes instruments that are valued based on quoted prices for similar instruments for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

4.8.2 Financial instruments measured at fair value - fair value hierarchy

The following table summarises the carrying amounts of financial assets and liabilities not measured at fair value and their fair value measurements as at the reporting date by the level in the fair value hierarchy into which the fair value measurement is categorised. The amounts are based on the values recognised in the statement of financial position.

30 June 2026	Carrying amount Birr'000	Fair value Birr'000	Level 1 Birr'000	Level 2 Birr'000	Level 3 Birr'000	Total Birr'000

		30 June 2026 Birr'000	30 June 2025 Birr'000
8a	**Rental income**		
	From buildings located in Addis Ababa	4,981	11,145
	From Buildings reside in regional cities	5,504	287
		10,485	**11,432**

This rental income is derived from small, excess office spaces in Addis Ababa and regional cities that are rented out beyond the bank's own operational needs. Although they generate rent, these buildings are classified under Property, Plant, and Equipment (PPE) and repossessed properties because the bank primarily uses them for its own business operations rather than holding them to run a rental business.

16b Digital lending

During the reporting period, the Bank, in collaboration with Qena, a platform by Kifya Financial Technology, officially launched its digital lending product, "Efoyta". The digital lending product aims to benefit various segments of society by providing accessible financing. Efoyta is designed to alleviate cash shortage challenges and especially meet the working capital needs of micro, small, and medium enterprises (MSMEs), as well as enable salaried employees to access an emergency loan facility.

24a Short term borrowings

Governed primarily by Directive No. MFAD/IBM/03/2024, the National Bank of Ethiopia (NBE) established a modernized interbank money market. Operated in partnership with the Ethiopian Securities Exchange (ESX), the platform allows commercial banks to seamlessly lend and borrow short-term funds (overnight and 7-day tenors) at market-determined interest rates to manage daily liquidity. The following table shows the bank's borrowing from the market at the end of the reporting period. The bank had no outstanding borrowing at the end of the previous year.

Borrowed from	**Period**	**Currency**	**Interest rate**	**Amount as of June 30, 2026 ETB'000**
	7 days	ETB	13%	1,500,000
Interbank money market	7 days	ETB	12%	500,000
	Overnight	ETB	12%	3,500,000
	Total			**5,500,000**

25	Employee benefit obligations	30 June 2026	30 June 2025
25a	Defined benefits liabilities:	Birr'000	Birr'000
	-Severance benefits	543,327	504,869
	Liability in the statement of financial position	**543,327**	**504,869**

	Income statement charge included in personnel expenses:	30 June 2026	30 June 2025
		Birr'000	Birr'000
	– Severance pay	124,666	74,880
	Total defined benefit expenses	**124,666**	**74,880**
	Remeasurements for:		
	– Severance pay	46,992	(119,790)
		46,992	**(119,790)**

The income statement charge included within personnel expenses includes current service cost, interest cost, past service costs on the defined benefit schemes.

25b Severance pay

The Bank operates an unfunded severance pay plan for its employees who have served the Bank for 5 years and above and are below the retirement age (i.e. has not met the requirement to access the pension fund and provident fund). The final pay-out is determined by reference to current benefit's level (monthly salary) and number of years in service and is calculated as 1 month salary for the first year in employment plus 1/3 of monthly salary for each subsequent in employment to a maximum of 12 months final monthly salary.

Below are the details of movements and amounts recognised in the financial statements:

Wegagen Bank S.C
Annual Consolidated and Separate Financial Statements
For the Year Ended 30 June 2026

The movement in the defined benefit obligation over the years is as follows:

	30 June 2026 Birr'000	30 June 2025 Birr'000
At the beginning of the year	504,869	288,457
Current service cost	49,425	19,698
Interest cost	75,241	55,182
Re-measurement (gains)/ losses	(67,132)	171,128
Additional re-measurement	2,285	-
Benefits paid	(21,361)	(29,596)
At the end of the year	**543,327**	**504,869**

The significant actuarial assumptions were as follows:

i) Actuarial Assumption

	30 June 2026 Birr'000	30 June 2025 Birr'000
Discount Rate	16.00%	14.50%
Salary Increase rate	14.00%	14.20%
Mortality Assumptions – Males	DHS 2016 Males	DHS 2016 Males
Mortality Assumptions – Females	DHS 2016 Female	DHS 2016 Female
Weighted average duration of defined benefit obligation	8.33	10

ii) Mortality in Service

The mortality table used for the current employees was DHS 2016 tables as published by the CSA (Central Statistics Agency) of Ethiopia. Based on our knowledge of the region mortality, we believe that this table is suitable for use in this valuation. Since the rates are provided in 5-year bands, we applied the rate provided per band as the mortality rate for the age in the middle of each band and interpolated linearly for rates in between these ages

	Mortality rate	
Age	**Males**	**Females**
20	0.31%	0.22%
25	0.30%	0.23%
30	0.36%	0.31%
35	0.41%	0.28%
40	0.52%	0.32%
45	0.45%	0.43%
50	0.63%	0.63%
55	0.98%	0.98%
60	1.54%	1.54%

iii) Withdrawal/Resignation from Service

The withdrawal rates are believed to be reasonably representative of the Ethiopian experience. The valuation assumed that resignation rates decrease by 2.5% for each age from 15% at age 20 (and below) to 0% at age 50. A sample of the resignation rates is summarised in the table below.

Age	Resignation rates per annum
20	15.00%
25	12.50%
30	10.00%
35	7.50%
40	5.00%
45	2.50%
50	0.00%
55	0.08%

IV) Health/Disability

The rates selected are consistent with those used for other African post employment benefits arrangement and are ActServ best estimate of the expected future long-term experience of the bank. These rates are internally developed by ActServ.

Age	Males	Females
20	0.04%	0.04%
25	0.04%	0.04%
30	0.04%	0.04%
35	0.04%	0.04%
40	0.06%	0.05%
45	0.11%	0.08%
50	0.20%	0.14%
55	0.35%	0.25%
60	0.57%	0.42%

The sensitivity of the main results to changes in the assumed salary escalation rates, discount rate, and mortality has been calculated based on the duration of the liabilities. The changes in the 30 June 2026 defined benefit obligation and the assets are reflected below:

Wegagen Bank S.C
Annual Consolidated and Separate Financial Statements
For the Year Ended 30 June 2026

	Base DBO	Current service cost one year impact	% Change
	Birr'000	Birr'000	Birr'000

26 Share capital

	30 June 2026	30 June 2025
	Birr'000	Birr'000
Authorised:		
Ordinary shares of Birr 1000 each	20,000,000	20,000,000
Number of Shares:		
Total number of shares	10,095	7,028
Issued and fully paid:		
Ordinary shares of Birr 1000 each	10,094,666	7,028,357
Share premium	103,315	87,819
	10,197,981	**7,116,176**

27 Earnings per share

Basic earnings per share (EPS) is calculated by dividing the profit after tax attritubale to ordinary shareholders by the weighted average number of ordinary shares in issue during the reporting period

	30 June 2026	30 June 2025
	Birr'000	Birr'000
Profit attributable to shareholders	3,154,253	2,778,853
Weighted average number of ordinary shares in issue	9,168,883	6,028,243
Basic earnings per share (%age)	**34.40%**	**46.10%**

Diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares. There were no potentially dilutive shares at the reporting date and the year before, hence the basic and diluted profit per share have the same value.

		30 June 2026 Birr'000	30 June 2025 Birr'000
28	**Retained earnings**		
	At the beginning of the year	1,944,300	1,246,781

32 Employees

The total number of persons employed by the Bank including investment Bank during the year was as follows:

	30 June 2026 Number	30 June 2025 Number
Total staff	**5,591**	**5,553**

33 Contingent liabilities and assets

33a Claims and litigation

In the ordinary course of business, the Bank is involved in various legal proceedings initiated by third parties and individuals. As of June 30, 2026, the maximum potential exposure arising from these cases was Br. 577.7 million (June 30, 2025: Br. 706.81 million). Based on its evaluation, the Bank has set aside a provision of Br. 70.35 million (June 30, 2025: Br. 70.35 million). For the remaining lawsuits, the likelihood of an adverse ruling is considered low, and no liabilities are expected to materialise.

33b Guarantees and letters of credit

The Bank conducts business involving issuance of various bid bond, performance bonds and advance payment guarantees. These instruments are given as a security to support the performance of a customer to third parties. The Bank also issued letter of credit facilities to importers, whcih created committment to the Bank to settle the obligation in foreign currency when the L/C documents are clearly presented to the Bank and recover the amount from custmers in local currency. As the Bank will only be required to meet these obligations in the event of the customer's default, the cash requirements of these instruments are expected to be considerably below their nominal amounts.

The table below summarises the fair value amount of contingent liabilities for the account of customers:

	30 June 2026 Birr'000	30 June 2025 Birr'000
Guarantees issued	9,246,187	4,583,597
Letter of credit	24,380,565	3,322,967
	33,626,752	**7,906,564**

Loan commitments;		
Unutilized overdraft and other facilities	8,878,483	6,100,397
	8,878,483	**6,100,397**

34 Events after reporting period

In the opinion of the directors, there were no significant post-balance-sheet events which could have a material effect on the state of affairs of the bank as at June 30, 2026, and on the profit for the year ended on that date, which have not been adequately provided for or disclosed.

35 Segment Reporting

A segment is a distinguishable component of the Bank that is engaged in providing products or services within a particular economic environment which is subject to risks and rewards that are different from those of other segments . Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

The chief operating decision maker is the person of the Bank that allocates resources to and assesses the performance of the operating segments of an entity.

The Bank has determined the Board of Directors as its chief operating decision maker. All transactions between business segments are conducted on commercial terms basis with intra-segment revenue and costs being eliminated at Bank level.

Segment information

IFRS 8 requires operating segments to be identified on the bases of internal reports about components of the bank that are regularily reviewd by the borad of directors in order to allocate resources to the segment and to assess its performance

Information reported to the Bank's Board of Directors for the purposes of resource allocation and assessment of segment performance is focused on products and services.

The accounting policies of the reportable segments are the same as the Bank's accounting policies described in note 2

For management purposes, the Bank has been organised into two operating segments based on products and services, as follows:

1• Interest Free Banking- All Islamic banking products offered to customers are included under the Islamic Banking segment. These products inlcude Wadiah deposits, Amanah deposits and mudarabah investments,Murabaha and Qard Financing.

2• Conventional Banking- The conventional banking segment comprises of corporate,retail and institutional banking customers in various sectors which include agriculture, manufacturing, domestic trade, construction, hotel and tourism, microfinance institutions, mortgage loans and personal loans. It also comprises public,private,cooperative,government and non-governmental orginizations deposits.

The Executive Management Committee have monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on operating profits or losses and is measured consistently with operating profits or losses in the consolidated financial statements. However, income taxes are managed at bank level and are not allocated to operating segments.

Transfer prices between operating segments are based on the Bank's internal pricing framework.

No revenue from transactions with single external customer or Counterparty amounted to 10% or more of the bank's total reveunue in 2025/2026

	Sundries-Local	148,042	61,684
	Gain from foreign exchange rate spread	-	605,983
	Gain on foreign exchange	922,289	1,807,698
		1,196,775	**2,554,484**

		30 June 2026 Birr'000	30 June 2025 Birr'000
39a	**Rental income**		
	From buildings located in Addis Ababa	7,526	11,145
	From Buildings reside in regional cities	2,959	287
		10,485	**11,432**

This rental income is derived from small, excess office spaces in Addis Ababa and regional cities that are rented out beyond the bank's own operational needs. Although they generate rent, these buildings are classified under Property, Plant, and Equipment (PPE) and repossessed properties because the bank primarily uses them for its own business operations rather than holding them to run a rental business.

51a Defined benefits liabilities:	30 June 2026 Birr'000	30 June 2025 Birr'000
-Severance benefits	541,042	504,869
Liability in the statement of financial position	**541,042**	**504,869**

Income statement charge included in personnel expenses:	30 June 2026 Birr'000	30 June 2025 Birr'000
– Severance pay	124,666	74,880
Total defined benefit expenses	124,666	74,880
Remeasurements for:		
– Severance pay	46,992	(12,971)
	46,992	**(12,971)**

The income statement charge included within personnel expenses includes current service cost, interest cost, past service costs on the defined benefit schemes.

51b Severance pay

The Bank operates an unfunded severance pay plan for its employees who have served the Bank for 5 years and above and are below the retirement age (i.e. has not met the requirement to access the pension fund and provident fund). The final pay-out is determined by reference to current benefit's level (monthly salary) and number of years in service and is calculated as 1 month salary for the first year in employment plus 1/3 of monthly salary for each subsequent in employment to a maximum of 12 months final monthly salary.

Below are the details of movements and amounts recognised in the financial statements:

		30 June 2026 Birr'000	30 June 2025 Birr'000
A	**Liability recognised in the stat. of financial position**	541,042	504,869

		30 June 2026 Birr'000	30 June 2025 Birr'000
B	**Amount recognised in profit or loss statement**		
	Current service cost	49,425	19,698
	Interest cost	75,241	55,182
		124,666	**74,880**

Retirement benefit obligations (Contd)

		30 June 2026 Birr'000	30 June 2025 Birr'000
C	**Amount recognised in other comprehensive income:**		
	Remeasurement gain or(loss) arising from experience	(9,088)	(93,703)
	Re-measurement gain or(loss) arising from economic assumptions	76,219	(77,425)
		67,132	(171,128)
	Tax Credit/Charge at 30%	(20,140)	51,338
		46,992	**(119,790)**

The movement in the defined benefit obligation over the years is as follows:

	30 June 2026 Birr'000	30 June 2025 Birr'000
At the beginning of the year	**504,869**	**288,457**
Current service cost	49,425	19,698
Interest cost	75,241	55,182
Re-measurement (gains)/ losses	(67,132)	171,128
Benefits paid	(21,361)	(29,596)
At the end of the year	**541,042**	**504,869**

Wegagen Bank S.C
Annual Separate Financial Statement
For the Year Ended 30 June 2026

The significant actuarial assumptions were as follows:

i) Actuarial Assumption

	30 June 2026 Birr'000	30 June 2025 Birr'000
Discount Rate	16.00%	14.50%
Salary Increase rate	14.00%	14.20%
Mortality Assumptions – Males	DHS 2016 Males	DHS 2016 Males
Mortality Assumptions – Females	DHS 2016 Female	DHS 2016 Female
Weighted average duration of defined benefit obligation	8.33	10

ii) Mortality in Service

The mortality table used for the current employees was DHS 2016 tables as published by the CSA (Central Statistics Agency) of Ethiopia. Based on our knowledge of the region mortality, we believe that this table is suitable for use in this valuation. Since the rates are provided in 5-year bands, we applied the rate provided per band as the mortality rate for the age in the middle of each band and interpolated linearly for rates in between these ages.

	Mortality rate	
Age	Males	Females
20	**0.31%**	**0.22%**
25	**0.30%**	**0.23%**
30	**0.36%**	**0.31%**
35	**0.41%**	**0.28%**
40	**0.52%**	**0.32%**
45	**0.45%**	**0.43%**
50	**0.63%**	**0.63%**
55	**0.98%**	**0.98%**
60	**1.54%**	**1.54%**

iii) Withdrawal/Resignation from Service

The withdrawal rates are believed to be reasonably representative of the Ethiopian experience. The valuation assumed that resignation rates decrease by 2.5% for each age from 15% at age 20 (and below) to 0% at age 50. A sample of the resignation rates is summarised in the table below.

Age	Resignation rates per annum
20	15.00%
25	12.50%
30	10.00%
35	7.50%
40	5.00%
45	2.50%
50	0.00%
55	0.08%

IV) **Health/Disability**

The rates selected are consistent with those used for other African post employment benefits arrangement and are ActServ best estimate of the expected future long-term experience of the bank. These rates are internally developed by ActServ.

Age	Males	Females
20	0.04%	0.04%
25	0.04%	0.04%
30	0.04%	0.04%
35	0.04%	0.04%
40	0.06%	0.05%
45	0.11%	0.08%
50	0.20%	0.14%
55	0.35%	0.25%
60	0.57%	0.42%

The sensitivity of the main results to changes in the assumed salary escalation rates, discount rate, and mortality has been calculated based on the duration of the liabilities. The changes in the 30 June 2026 defined benefit obligation and the assets are reflected below:

	Base DBO Birr'000	Current service cost one year impact Birr'000	% Change Birr'000
Discount rate + 1%	541,042	501,069	-7.39%
Discount rate - 1%	541,042	580,690	7.33%
Salary increase +1%	541,042	578,749	6.97%
Salary decrease -1%	541,042	502,351	-7.15%
Mortality increase +10%	541,042	540,914	-0.02%
Mortality decrease -10%	541,042	535,016	-1.11%

52 Earnings per share

Basic earnings per share (EPS) is calculated by dividing the profit after tax attritubale to ordinary shareholders by the weighted average number of ordinary shares in issue during the reporting period

	30 June 2026 Birr'000	30 June 2025 Birr'000
Profit attributable to shareholders	3,108,105	2,784,400
Weighted average number of ordinary shares in issue	9,168,883	6,028,243
Basic earnings per share (%age)	**33.90%**	**46.19%**

Wegagen Bank S.C
Annual Separate Financial Statement
For the Year Ended 30 June 2026

Diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares. There were no potentially dilutive shares at the reporting date and the year before, hence the basic and diluted profit per share have the same value.

		30 June 2026	30 June 2025
		Birr'000	Birr'000
53	**Retained earnings**		
	At the beginning of the year	1,948,124	1,246,781
